When the road home becomes daunting—sometimes a very capable girl on a bicycle can help find the way. “ Charming, surprising, familiar, and just downright wonderful. ” —Allie Pleiter, author of *Yukon Wedding* and *Bluegrass Blessings* When principal ballerina Sasha Davis suffers a career-ending injury at age thirty-eight, she leaves her Boston-based dance company and retreats to the home of her youth in Minnesota. But Sasha ' s injuries limit her as much as her mother ' s recent death haunts her. Concluding she can ' t recover alone, Sasha reluctantly hires a temporary live-in aide. Enter the übercapable Evelyn Burt. As large-boned as Sasha is delicate, Evelyn is her employer ' s opposite in every way. Small town to Sasha ' s urban chic, outgoing to Sasha ' s iciness, and undaunted where Sasha is hopeless, nineteen-year-old Evelyn is newly engaged and sees the world as one big, shiny opportunity. Evelyn soon discovers Sasha needs to heal more than bones. Slowly, as the wounds begin to mend and the tables tilt, the two women form an unlikely alliance and discover the astounding power of even the smallest act done in the name of love. *Finding Our Way Home* is a story of second chances and lavish grace.

As the Great Depression started in 1929, several dozen creative individuals from a variety of artistic fields, including theatre, advertising, graphics, fashion and furniture design, pioneered a new profession. Responding to unprecedented public and industry demand for new styles, these artists entered the industrial world during what was called the "Machine Age," to introduce "modern design" to the external appearance and form of mass-produced, functional, mechanical consumer products formerly not considered art. The popular designs by these "machine designers" increased sales and profits dramatically for manufacturers, which helped the economy to recover; established a new profession, industrial design; and within a decade, changed American products from mechanical monstrosities into sleek, modern forms expressive of the future. This book is about those industrial designers and how they founded, developed, educated and organized today's profession of more than 50,000 practitioners.
