The objective of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012) is to facilitate an exchange of information on best practices for the latest research advances in the area of communications, networks and intelligence applications. These mainly involve computer science and engineering, informatics, communications and control, electrical engineering, information computing, and business intelligence and management. Proceedings of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012) will focus on green information technology and applications, which will provide in-depth insights for engineers and scientists in academia, industry, and government. The book addresses the most innovative research developments including technical challenges, social and economic issues, and presents and discusses the authors' ideas, experiences, findings, and current projects on all aspects of advanced green information technology and applications. Yuhang Yang is a professor at the Department of Electronic Engineering, Shanghai Jiao Tong University. Maode Ma is an associate professor at the School of Electrical & Electronic Engineering, Nanyang Technological University.

The page numbers exactly match those in the question book. This makes looking up the information you want quick and easy. The questions are freely available on the website and the Model Answers can also be bought as a download . Please visit www.bland.in

The Last Apprentice series follows the terrifying adventures of the Spook's apprentice, Thomas Ward. But Tom's is only one story. There are others. . . . The Spook himself was once an apprentice. How did he begin his training? And what of Alice, the young witch who is Tom's closest ally? How did she overcome her dark past? What did the witch assassin Grimalkin do to become the most deadly and feared witch in the county? And, collected in a gallery of horrors, discover the rest of the county's menacing villains and relive the vicious battles waged against them. Enter a land where creatures of the dark creep out of the shadows. Do you dare?

Mao Zedong's political career spanned more than half a century. The ideas he championed transformed one of the largest nations on earth and inspired revolutionary movements across the world. Even today Mao lives on in China, where he is regarded by many as a near-mythical figure, and in the West, where a burgeoning literature continues to debate his memory. In this book, leading scholars from different generations and around the world offer a critical evaluation of the life and legacy of China's most famous - some would say infamous - son. The book brings the scholarship on Mao up to date, and its alternative perspectives equip readers to assess for themselves the nature of this mercurial figure and his significance in modern Chinese history.

RAND studied 89 modern insurgency cases to test conventional understanding about how insurgencies end. Findings relevant to policymakers and analysts include that modern insurgencies last about ten years; withdrawal of state support cripples insurgencies; civil defense forces are useful for both sides; pseudodemocracies fare poorly against insurgents; and governments win more often in the long run.

Collins New GCSE Maths Homework Books are excellent companions to Collins New GCSE Maths Student Books. Following the familiar structure and layout of the Student Book, the Homework Book provides extensive practice of all the elements of the new curriculum at Grades G to C to ensure that your students achieve the best grades in mathematics. Collins New GCSE Maths EDEXCEL Linear Homework Book Foundation 1 is written by experienced teachers and examiners, and provides comprehensive practice for all the topics covered in Collins New GCSE Maths EDEXCEL Linear Student Book Foundation 1. It fully supports your students in learning the new 2010 GCSE Maths EDEXCEL specification and will ensure that they achieve the best grades: * Provide excellent additional practice for all topics covered in the Student Book with brand-new questions not found in the Student Book * Enable students to assess their own progress through each chapter with familiar colour-coded grades in every exercise * Extend students' thinking and problem-solving skills with open-ended investigative tasks at the end of every chapter * Assess students' work with answers to homework questions conveniently located in Collins New GCSE Maths [EDEXCEL Linear Teacher's Pack Foundation 1 * Give students easy reference to the clear explanations and examples in their textbooks with a free CD-ROM of Collins New GCSE Maths EDEXCEL Linear Student Book Foundation 1 with every Homework Book

This is the first full-length scholarly study of the Chinese 'core' leader and his role in the Chinese Communist Party's elite politics.

In 1964, the Chinese Communist Party (CCP) made a momentous policy decision. In response to rising tensions with the United States and Soviet Union, a top-secret massive military industrial complex in the mountains of inland China was built, which the CCP hoped to keep hidden from enemy bombers. Mao named this the Third Front. The Third Front received more government investment than any other developmental initiative of the Mao era, and yet this huge industrial war machine, which saw the mobilization of twelve million people, was not officially acknowledged for over a decade and a half. Drawing on a rich collection of archival documents, memoirs, and oral interviews, Covell Meyskens provides the first history of the Third Front campaign. He shows how the militarization of Chinese industrialization linked millions of everyday lives to the global Cold War, merging global geopolitics with local change.

Since the end of World War II, there have been 181 insurgencies around the world. In fact, most modern warfare occurs in the form of insurgencies, including in such high-profile countries as Iraq, Syria, Libya, Afghanistan, and Ukraine. However, in spite of their prevalence, we still know relatively little about how insurgencies function. With more than three dozen violent insurgencies currently taking place today, a deeper understanding of insurgent groups is more important than ever. In Waging Insurgent Warfare, Seth G. Jones offers new insights into the dynamics of insurgent groups. Jones weaves together examples from current events and recent history to identify the factors that contribute to the rise of an insurgency, the key components involved in conducting an insurgency, from selecting an organizational structure to securing aid from an outside source, and the elements that contribute to the end of insurgencies. Through examining the strategies, tactics, and campaigns that insurgents use, as well as how these factors relate to each other on the ground, Jones provides a comprehensive understanding of the ways in which insurgent groups operate. Empirically rich and historically informed, Waging Insurgent Warfare features data on over one hundred factors for every insurgency that has taken place between 1946 and 2015. While the primary emphasis revolves around insurgency, the findings in this book also have important implications for waging counterinsurgent warfare. Bringing together the existing body of knowledge on insurgencies, Jones provides a practical, accessible resource to help understand insurgent warfare. The definitive resource on insurgency, Waging Insurgent Warfare will appeal to anyone with an interest in insurgency, counterinsurgency, or modern war.
