This essential guide provides both new and established trainers with accessible, innovative and engaging strategies to create an inspirational learning environment. This professional book is suitable for early years, primary and secondary teachers, school leaders and heads of department who are supporting their teaching colleagues in schools. It offers practical advice on planning and delivering great training sessions, including suggestions on how best to share existing knowledge in a group and how to combine dialogue and written text to effectively develop ideas in the classroom. The thinking behind each idea is not only clearly explained but is accompanied with a wealth of practical strategies that can be applied to a variety of training and teaching situations. This accessible resource is designed to help busy teaching professionals motivate their colleagues and deliver effective training. Generously illustrated throughout, the book is separated into four learning phases: preparing for successful training; offering direct input through new ideas; embedding participant learning; and monitoring, evaluating and planning for the future. Becoming a Brilliant Trainer: A Teacher ' s Guide to Running Sessions and Engaging Learners will be an invaluable text for both trainee and qualified teachers, school leaders and all those with an interest in delivering great training sessions.

Moving Beyond Icebreakers contains 440 pages packed with insight and ideas about building community, engaging students in learning, and making meetings work. It describes an innovative meeting format and documents over 300 interactive exercises (not just "icebreakers") that enable readers to: \* Achieve group goals \* Build relationships \* Resolve group problems \* Teach, lead, motivate, and inspire The first 130 pages describe how to use "icebreakers" and other interactive methods to help group members make decisions, create new ideas, solve problems, resolve conflicts, and understand new concepts. In these pages you will find a five-part meeting structure that you can use to become an expert facilitator, following an approach that engages both youth and adults in meeting the group's goals. You will also find detailed agendas, lesson plans, and scenarios that show how this approach works in the real world. Table of contents: \* Why use interactive methods? \* Working into interaction \* Coping with resistance and fear of failure \* The interactive meeting format \* Interactive exercises (name exercises, warm-up questions, five-minute springboard exercises, fifteen-minute springboard exercises, in-your-chair springboard exercises, tag-style springboard exercises, springboard exercises for groups both large and small, the rest of the springboard exercises, work-station exercises, evaluation exercises).

This is an invaluable collection, offering 140 different activities, exercises and strategies, which the authors have tried and tested through years of teaching experience.

The development of Human Resource has assumed importance particularly after the government's focus on HRD, introduction of liberalized economy and globalisation of world trade. This has led to world trade competition. For this purpose, every corporate entity sought ISO certification, which enjoins on the industry to impart regular training to its workforce. Thus training has taken centerstage. HR is now considered as human capital and much importance is given to the development and training of this unique resource. The one area in HR that found global visibility is training. Training has a direct relationship to HR's concern about human capital development and globalisation of workforce. People want to study at their own pace and time. The exciting development area is therefore e-learning. Keeping the above developments in view, it is imperative that business organisations should develop their own internal resources for training and development of their workforce. While giving stress on management development, most organizations ignore development and training of operatives who constitute the bulwark of their human capital. This aspect has been suitably taken care of in this book. This comprehensive book covers all aspects of training and development starting from conceptual inputs to management of training environment, instructor's competencies, transfer of learning, IT based training, to mention a few should be presented to line managers. The book is divided into four parts - Training and Development, Training Delivery, Evaluation of Training, and the last part containing eleven Appendices relating to the Text.Attempt has been made to present the subject in a succinct and lucid manner, bringing the latest on the subject. The text focuses not only on the traditional training methods, but also on the importance of development dimensions. This comprehensive compendium on training and development, sprinkled with copious examples, will be useful for the budding trainers, HR practitioners and academicians alike.

This work introduces methods that aid in freshman retention (in the transition from high school and to remain in the university of origin) and orient them towards a successful career in science. Specific examples of successful approaches are given as well as detailed plans for how to engage these students. Pitfalls as well as success are described. In addition this work provides a detailed description of how to develop the students into a cohort that exhibits comradery. Three types of cohort form, those within the freshman class, those among the upperclassmen and those between the freshmen and upperclassmen. The program works because the social reality is that the peer mentor has a better repertoire with the first semester freshmen than the faculty or staff and assists with student success. Factors such as financial aid, policy, and support systems influence student success. In the sciences, students often struggle with the content and adjusting to the college experience. Research states that a mentorship program supports retention as well as enhances the student experience during college. This program creates a cohort group among the upperclassmen mentors and freshmen and provides leadership development for all involved.

"This book aims to be a straightforward and practical "how to teach" book. It is intended for those teaching in either schools, colleges or universities, as well as those teaching or training in industry, commerce or the public services"--Preface.
