This book provides students and professionals with practical answers to important career and communication questions, helping them to communicate successfully in a business setting. Communication expert, Deirdre Breakenridge, examines the ways in which professionals can make the most of their careers in a fast-changing media landscape, offering advice on how new and seasoned executives can utilize and adapt to the latest modes of communication. The author breaks down the eight most critical areas for professionals seeking to develop their communication skills, opening with essentials that will prove useful in any setting. She then details the ways in which organizations can adapt to changes in technology and consumer behavior to improve relationships, social media presence, and brand recognition. The easy to follow question-answer format walks readers through the most pressing, confusing, and frequently asked questions about successful communication with plenty of advice and examples for a better learning experience. Covering traditional business communication topics like partnerships and storytelling, the book also includes material on digital and social media channels as well as a chapter on giving back as a mentor. "Experts Weigh In" boxes feature advice from other top professionals, exposing the reader to multiple perspectives from the field. Grounded in decades of experience, Answers for Modern Communicators will benefit all students getting ready to enter the workforce as well as professionals looking to enhance their communication skills.

"Contemporary Mind - Some Modern Answers" is a fantastic collection of essays by English science writer John W. Sullivan. They deal with a range of subjects, ranging from mysticism and immortality to the relationship between science and art. John William Navin Sullivan (1886 - 1937) was a literary journalist and popular science writer most famous for his study of Beethoven. He is also responsible for having written some of the earliest non-technical accounts of Einstein's General Theory of Relativity, and he was acquainted with many important writers in London in the 1920s, including John Middleton Murry, Aldous Huxley, Wyndham Lewis, Aleister Crowley and T. S. Eliot. Other notable works by this author include "Aspects of Science" (1923), "Aspects of Science: Second Series" (1926), and An Outline of Modern Knowledge (1931). Contents include: "The Balanced Life", "The Problem of Suffering", "The Necessity of Mysticism", "Human Immortality", "A Dissertation on Beethoven", "The Scientific Outlook",

Contrary to popular perceptions, the European Middle Ages were a fertile intellectual period in history. The groundwork laid by scholastic philosophers of the Middle Ages made the advancements of the Renaissance possible. Given the myriad of social and political questions confronting us today, the author sent via time machine a letter to a scholastic philosopher to obtain the medieval perspective on these pressing modern problems. This book is the response that he received. It addresses a wide range of modern issues from a medieval perspective, ranging from the political (such as questions relating to socialism, immigration, and the right to bear arms) to the deeply personal (such as abortion and transgender rights). The book is written in the same question and answer style used by the scholastics, and is well researched with over 200 citations to medieval and classical sources. This volume, devoted to the treatment of nervous and mental diseases, is designed to meet the needs which the rapid advances in knowledge of neurology and psychiatry have created. The nervous system is here regarded as a whole and as inclusive of the mind, and it is maintained that disturbances of any and all of its functions, mental as well as physical, are proper subjects for therapeutics. The present work lays emphasis upon the psychical side of life as being worth quite as much consideration as the physical. It sets forth doctrines of nervous and mental hygiene, reconstructive factors in social

organization as applied to human ills, and endeavors to present a broad front to the pessimistic nihilism in therapeutics that has been too long current in these fields, because the doctor's eyes have been too closely focused on the individual examples and results of human accidents. Neurology and psychiatry offer the widest possible opportunities for preventive medicine as well as for therapeutic optimism. The program here presented is essentially therapeutic. Planned as it has been on a broad scale, the more practical issues confronting the clinician have, nevertheless, been fully met. The editors have sacrificed philosophical views for more definite guideposts wherever, in the present state of our knowledge, such a course seemed wiser.
