This new edition of Friedman's landmark book explains the flattening of the world better than ever- and takes a new measure of the effects of this change on each of us.

At once a non-fiction thriller and a moral maze, this is one man's epic story of trying to find a safe place in the world. When Ali Al Jenabi flees Saddam Hussein's torture chambers, he is forced to leave his family behind in Iraq. What follows is an incredible international odyssey through the shadow world of fake passports, crowded camps and illegal border crossings, living every day with excruciating uncertainty about what the next will bring. Through betrayal, triumph, misfortune - even romance and heartbreak - Ali is sustained by his fierce love of freedom and family. Continually pushed to the limits of his endurance, eventually he must confront what he has been forced to become. With enormous power and insight, The People Smuggler tells a story of daily heroism, bringing to life the forces that drive so many people to put their lives in unscrupulous hands. It is an utterly gripping portrait of a man cut loose from the protections of civilisation, attempting to retain his dignity and humanity while taking whatever path he can out of an impossible position. 'This is a story that had to be told.' The Weekend Australian 'An engrossing account of a man seen by some as a saviour and others as a criminal. A significant book.' Thomas Keneally 'Gripping.' The Age 'Tight, powerful and extraordinarily well written a book which glories in the strength, courage and compassion of the human spirit.' The Drum 'Just mindblowing a moving saga of endurance and bravery.' The Australian Way (Qantas Magazine) 'A totally riveting story about a brave and honourable man. Passionate, vivid and true, it bounces off the page.' Rosie Scott

The Karing Manual is new in paperback. In recent years, karing has grown significantly as an accessible, affordable introduction to motorsport with the emergence of indoor karing tracks across Europe, and many first-time karters are sufficiently stirred by the experience to want to progress further. Now in its second edition, this comprehensive practical book covers all the fundamentals of kart racing, catering for the complete novice, yet sufficiently detailed to benefit those racing at club level

CRITICAL THINKING: A USER'S MANUAL offers an innovative skill-based approach to critical thinking that provides step-by-step tools for examining arguments. Users build a complete skill set by recognizing, analyzing, diagramming, and evaluating arguments. Later chapters encourage application of the basic skills to categorical, truth-functional, analogical and inductive, and causal arguments as well as fallacies. Exercises throughout the book engage readers in active learning, integrate writing as part of the critical thinking process, and emphasize skill transference. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Global corporations initiate, join and maintain socio-technological change and hence, alter the ways in which we organize our lives. Demanding significant investment of resources and time, the development and implementation of new technologies on different levels must take into consideration these subtle processes. As such, it is particularly important that we have a greater insight into the practices of hi-tech corporations, in view of the often inflated promises of and concerns about the destiny of technological breakthroughs, especially those promising sizeable economic outcomes and societal transformation. Elena Simakova undertook a lengthy ethnographic study, working alongside marketing managers in a global IT corporation in their Europe, Middle East and Africa (EMEA) headquarters in the UK. Using the experience gained through a close participation in their everyday corporate rituals and routines, her account challenges common perceptions of how corporations make the world think and act with regard to technologies in particular ways. The book contains an interesting case study on the launch of a radio frequency identification (RFID) based solution. Unravelling the construction of expectations, inclusions and exclusions around emerging technologies, this reflexive account also tackles uneasy practical and methodological questions pertinent to corporate ethnography. This book is an essential read for scholars in science and technology studies, economic sociology, anthropology, as well as management and organizational studies and research policy.
