A breakout is most likely occurring when candlesticks close above the band resistance or below the band support. Tip #5: Candle Close and Body above the S&R When using moving averages and trend lines (as mentioned in tip 4), it is a useful tactic to review the relationship of price action with the support or resistance (S&R) level.

[Avoid False Breakouts with our 5 Key Breakout Tips](#)

A breakout occurs when price clears a critical level on your chart. These levels could be a trend line, support, resistance, or a key Fibonacci level. Remember, levels on your chart are psychological and represent the sentiments of day traders at a respective price level. When you think of day trading breakouts, what comes to mind?

[Day Trading Breakouts - 4 Simple Trading Strategies](#)

By definition, a real breakout is when the market overcomes our drawn support/resistance lines including the Tolerance zone. Some traders wait until the candlestick closes below support/above resistance line (i.e. the Tolerance zone determines the closing of the candlestick in a breakout).

Breakout candlestick Trading System - Forex Strategies ...

Cradle Pattern. • The Cradle Pattern is a symmetric bottom pattern that is easy to identify. – A downtrend becomes obvious with a large black candle at the bottom. – A series of small or indecisive trading days trade in a flat area. – A bullish candle, more powerful with a Bullish Engulfing signal, is formed of approximately the same magnitude as a Bearish candle at the end of the downtrend.

High Probability Candlestick Patterns & Set ups

False breakout patterns are one of the most important price action trading patterns to learn, because a false-break is often a very strong clue that price might be changing direction or that a trend might be resuming soon. A false-break of a level can be thought of as a 'deception' by the market, because it looks like price will breakout but then it quickly reverses, deceiving all those who took the 'bait' of the breakout.

While the candlestick pattern has several names, everyone agrees on one thing. As a result of a month within a tight trading range, the EURUSD is in Breakout Mode. This means that there is about a 50% chance of either a bull or bear breakout. Furthermore, there is a 50% chance that the first breakout will fail and reverse.
