you move down a group.

---

## Ch 6 Study Guide answers

apparent changes in matter result from changes in the groupings of atoms. Democritus further believed that matter is composed of empty space through which atoms move, that different kinds of atoms come in different sizes and shapes, and that the differing properties of atoms are due to the size, shape, and movement of the atoms.

Spectroscopy is the study of the interaction between  
matter and electromagnetic radiation as a function of  
the wavelength or frequency of the radiation.

Historically, spectroscopy originated as the study of  
the wavelength dependence of the absorption by gas  
phase matter of visible light dispersed by a prism.
