Managing Resource Records - cisco.com

Cisco Prime Network Registrar (CNR) is a Cisco software product that includes components for Domain Name System (DNS) services, Dynamic Host Configuration Protocol services, Trivial File Transfer Protocol (TFTP) services, and Simple Network Management Protocol functions. CNR provides a regional and local management structure and is supported on server hardware and software based on 32-bit and ...

Cisco Network Registrar - Wikipedia

I manage a Network Registrar service and I am looking to add new options to support MS Lync. I've been given options 42, 43 and 120 to implement, but I'm having problems with option 43. I've defined the vendor option through the gui, but when I try to assign a value, I get (EX_INVALID_ARG). Any idea...

Cisco Network Registrar 7.2 and MS Lync - Cisco Community

Cisco CNS Network Registrar includes a standards-compliant DNS server that offers a very advanced feature set, including support for incremental zone transfers, dynamic updates, and notify. The Cisco CNS Network Registrar DHCP server supports DHCP Safe Failover (redundant DHCP servers), dynamic DNS (DDNS) updates, DOCSIS cable modems, and integration with directory services using LDAPv 3.

Cisco Network Registrar (CNR) - Cisco Community

Configuring Cisco Network Registrar to use option 244 We are using Network Registrar Release 7.1.3. Dell provided the following link <https://support.software.dell.com/k2000-systems-deployment-appliance/kb/112037> for configuring DHCP options for their KACE tool.

Configuring Cisco Network Registrar to ... - Cisco Community

Cisco Network Registrar Software Releases prior to 7.2 contain a default password for the administrative account. During the initial installation, users are not forced to change this password, allowing it to persist after the installation. An attacker who is aware of this vulnerability could authenticate with administrative privileges and arbitrarily change the configuration of Cisco Network ...
