The existence of a new family of chemotactic cytokines was realised in 1987 following the isolation and structural determination by several groups of a peptide consisting of 72 amino acids which was a potent activator of neutrophils and a chemotactic agent for lymphocytes. The first symposium of this series was held at the Royal College of Surgeons of England in December 1988, entitled Novel Neutrophil Stimulating Peptides, and brought together the majority of the laboratories which had published in this area, see Immunology Today 10: 146-147(1989). Since the first symposium there has been a dramatic increase in our knowledge of the biology of this family of structurally related peptides. The Second International Symposium on Chemotactic Cytokines was held at the Royal College of Surgeons of England in June 1990. The aim of this symposium was to provide both a forum for discussion and to determine whether this knowledge can be utilised in the design of novel therapeutic strategies for the treatment of inflammatory disorders. Although the majority of studies have been concerned with the regulation of these peptides at the molecular and cellular level, there is now evidence to suggest that specific members of this superfamily have a role in the pathogenesis of a number of diverse diseases including arthritis, psoriasis, atherosclerosis, wound repair, inflammatory lung diseases and glomerulonephritis.

Newly revised in line with the latest syllabus and with a modernised, student-friendly design, including a truly interactive CD which provides additional practice for students and brings lab work to life with exciting activities and simulations.

The CSEC♦ Biology Concise Revision Course provides full coverage of the CSEC♦ Biology syllabus. This book provides comprehensive and authoritative guidance for the course. It adopts a practical, supportive approach to help students with their learning. Revision exam and assessment guidance questions throughout consolidate this learning. * Full coverage of the CSEC♦ Biology course * Advice on organising your revision includes tips on exam technique, explanations of exam command words, and guidance on drawing graphs, tables and diagrams * Revision questions at the end of each topic help to secure knowledge and understanding * Exam-style questions at the end of each section provide effective practice for the actual exam * Answers are available for free at www.collins.co.uk/caribbean

Two new titles that provide comprehensive coverage of the syllabus. Units 1 and 2 of Biology for CAPE® Examinations provide a comprehensive coverage of the CAPE® Biology syllabus. Written by highly experienced, internationally bestselling authors Mary and Geoff Jones and CAPE® Biology teacher and examiner Myda Ramesar, both books are in full colour and written in an accessible style. Learning objectives are presented at the beginning of each chapter, and to assist students preparing for the examination, each chapter is followed by questions in the style they will encounter on their examination papers.

For CXC students who want to prepare fully for their exams, CXC Study Guides are a series of titles that provide students with additional support to pass the exam. CXC Study Guides are a unique product that have been written by experienced examiners at CXC and carry the board's exclusive branding.

The past decade has seen an exponential increase in our knowledge and understanding of adipose tissue biology. This has coincided with the continued rise in obesity across all generations. Clearly despite substantial advances in research into adipose tissue this still has had limited impact on the on-going obesity epidemic across a majority of countries in the world. This book brings together many leading experts in the field to provide an up to date and comprehensive review of the key aspects of adipose tissue. It therefore includes chapters on evolution, development and inflammation together with a detailed review of brown and beige adipose tissue biology and their potential significance in preventing or combating obesity. These chapters are complemented by those on genetics and gender influences, together with nutrition through the life cycle. Ultimately the book provides an overview of the complexities of adipose tissue biology and the continuing challenge to combat obesity in the 21st century.

A step-by-step guide to conducting successful solution-focused therapy for survivors of traumatic experiences. This book aims to help therapists working with clients who struggle with trauma by offering them solution-focused (SF) viewpoints and skills. The book invites all professionals to change their focus from what is wrong to what is right with their clients, and from what isn't working to what is working in their lives. The book contains 101 solution-focused questions (and more) for help with trauma, with a focus on the clients' preferred future and the pathways to get there. As Insoo Kim Berg put it in her foreword for Fredrike Bannink's highly successful 1001 Solution-Focused Questions: Handbook for Solution-Focused Interviewing, "SFBT is based on the respectful assumption that clients have the inner resources to construct highly individualized and uniquely effective solutions to their problems." From the more than 2,000 questions she has collected over the years, Bannink has selected the 101 most relevant for each subject. Much of the material in the 3-volume set is unique and did not appear in the earlier work, inviting therapists to open themselves to a new light on interviewing clients.
