Karpal Singh is widely regarded as Malaysia ' s best criminal and constitutional lawyer. His sudden death on 17 April 2014 in a horrific car accident – just a month after he was convicted of sedition in the High Court – shocked and saddened Malaysians to the core and left a deep void in the country ' s legal and political landscape. Karpal was a fearless advocate for justice and a defender of human rights in South East Asia, and has appeared in the Privy Council in London on a number of occasions before such appeals were abandoned by Malaysia. He is renowned for his defence of many people from many nations who have faced the death penalty under Malaysia's Dangerous Drugs Act. In recent years, one of his biggest achievements was his successful defence of former Deputy Prime Minister Anwar Ibrahim on two charges of sodomy in 2012. On the night he died, Karpal was still fighting for Anwar, who had been convicted once again of sodomy, and seeking to reassure him. He told the Opposition leader in a telephone call he would do his best in the prosecution ' s ' fast-tracked ' Federal Court of Appeal. Indeed Karpal had Anwar ' s files with him in his vehicle when the fateful crash occurred. In this revised and updated edition, veteran journalist Tim Donoghue completes the biography of Malaysia ' s tenacious and principled lawyer-politician

The Real Cost of Insecure Software • In 1996, software defects in a Boeing 757 caused a crash that killed 70 people... • In 2003, a software vulnerability helped cause the largest U.S. power outage in decades... • In 2004, known software weaknesses let a hacker invade T-Mobile, capturing everything from passwords to Paris Hilton ' s photos... • In 2005, 23,900 Toyota Priuses were recalled for software errors that could cause the cars to shut down at highway speeds... • In 2006 dubbed “ The Year of Cybercrime, ” 7,000 software vulnerabilities were discovered that hackers could use to access private information... • In 2007,

operatives in two nations brazenly exploited software vulnerabilities to cripple the infrastructure and steal trade secrets from other sovereign nations. . . Software has become crucial to the very survival of civilization. But badly written, insecure software is hurting people – and costing businesses and individuals billions of dollars every year. This must change. In *Geekonomics*, David Rice shows how we can change it. Rice reveals why the software industry is rewarded for carelessness, and how we can revamp the industry 's incentives to get the reliability and security we desperately need and deserve. You ' ll discover why the software industry still has shockingly little accountability – and what we must do to fix that. Brilliantly written, utterly compelling, and thoroughly realistic, *Geekonomics* is a long-overdue call to arms. Whether you ' re software user, decision maker, employee, or business owner this book will change your life. . .or even save it.

Aline Leon In the last years, public attention was increasingly shifted by the media and world governments to the concepts of saving energy, reducing pollution, protecting the environment, and developing long-term energy supply solutions. In parallel, research funding relating to alternative fuels and energy carriers is increasing on both national and international levels. Why has future energy supply become such a matter of concern? The reasons are the problems created by the world ' s current energy supply system which is mainly based on fossil fuels. In fact, the energy stored in hydrocarbon-based solid, liquid, and gaseous fuels was, is, and will be widely consumed for internal combustion engine-based transportation, for electricity and heat generation in residential and industrial sectors, and for the production of fertilizers in agriculture, as it is convenient, abundant, and cheap. However, such a widespread use of fossil fuels by a constantly growing world population (from 2.3 billion in 1939 to 6.5 billion in 2006) gives rise to the two problems of oil supply and environmental degradation. The problem related to oil supply is caused by the fact that fossil fuels are non-renewable primary energy sources: This means that since the first barrel of petroleum has been pumped out from the ground, we have been exhausting a heritage given by nature.
