This book explores the role played by the individual in the economy, in particular, how the individual experiences the economy. It shows the role of government, markets, and welfare in shaping our lives, providing an overview of the workings of the economy that takes as its starting point the interface between the individual and the system.

'There is no alternative' has been the unofficial mantra of the neoliberal order since its utterance by Margaret Thatcher in the 1980s. However, there is an alternative to our crisis-ridden, austerity-inflicted world - and not just one alternative, but many. Challenging the arguments for markets, mainstream economics and capitalism from Adam Smith onwards, Economics After Capitalism provides a step-by-step guide to various writers, movements and schools of thought, critical of neoliberal globalisation. These range from Keynesian-inspired reformists such as Geroge Soros and Joseph Stiglitz, critics of inequality like Thomas Piketty and Amartya Sen, to more radical voices including Naomi Klein, Marxists such as David Harvey, anarchists, and autonomists including Toni Negri and Michael Hardt. By providing a clear and accessible guide to the economics of anti-capitalism, Derek Wall successfully demonstrates that an open source socialist alternative to rampant climate change, elite rule and financial chaos is not just necessary, but possible.

Explains the complicated subject of economics with illustrations and a series of easy-to-follow questions and answers.

Longlisted for the 2021 Porchlight Business Book Awards, Big Ideas & New Perspectives |She offers something both broad and scarce: a compelling new story about how to create a desirable future.¶New York Times An award-winning author and leading international economist delivers a hard-hitting and much needed critique of modern capitalism in which she argues that, to solve the massive crises facing us, we must be innovative!we must use collaborative, mission-oriented thinking while also bringing a stakeholder view of public private partnerships which means not only taking risks together but also sharing the rewards. Capitalism is in crisis. The rich have gotten richer!the 1 percent, those with more than \$1 million, own 44 percent of the world's wealth!while climate change is transforming!and in some cases wiping out!life on the planet. We are plagued by crises threatening our lives, and this situation is unsustainable. But how do we fix these problems decades in the making? Mission Economy looks at the grand challenges facing us in a radically new way. Global warming, pollution, dementia, obesity, gun violence, mobility!these environmental, health, and social dilemmas are huge, complex, and have no simple solutions. Mariana Mazzucato argues we need to think bigger and mobilize our resources in a way that is as bold as inspirational as the moon landing!this time to the most !wicked! social problems of our time... We can only begin to find answers if we fundamentally restructure capitalism to make it inclusive, sustainable, and driven by innovation that tackles concrete problems from the digital divide, to health pandemics, to our polluted cities. That means changing government tools and culture, creating new markers of corporate governance, and ensuring that corporations, society, and the government coalesce to share a common goal. We did it to go to the moon. We can do it again to fix our problems and improve the lives of every one of us. We simply can no longer afford not to.

'Economics is too important to be left to the economists. This concise and readable book provides non-specialist readers with all the information they need to understand how capitalism works (and how it doesn't). Economics for Everyone, now published in second edition, is an antidote to the abstract and ideological way that economics is normally taught and reported. Key concepts such as finance, competition and wages are explored, and their importance to everyday life is revealed. Stanford answers questions such as 'Do workers need capitalists?', 'Why does capitalism harm the environment?', and 'What really happens on the stock market?' The book will appeal to those working for a fairer world, and students of social sciences who need to engage with economics. It is illustrated with humorous and educational cartoons by Tony Biddle, and is supported with a comprehensive set of web-based course materials for popular economics courses.'--Publisher's description.

Think outside the borders. Global economics affects every aspect of our lives.
