Engineering Metrology and Measurements is a textbook designed for students of mechanical, production and allied disciplines to facilitate learning of various shop-floor measurement techniques and also understand the basics of mechanical measurements.

With design of products changing frequently, and functional requirements becoming more demanding, batch production of high precision components has become a necessity. The advent of NC and CNC has enabled automation of batch manufacturing supported by computerisation of manufacturing systems. The book is a complete reference consisting of several technologies associated with modern automated manufacturing.
