“Currently, the EPRI chemistry guidelines contain limits based on concentration thresholds, also known as action levels. So, for a plant sample in which a contaminant

# Download Free Epr Water Chemistry Guideline

exceeds a certain concentration, a specific action is taken. 'Action level one' may be to clean up the contaminant. Higher levels may involve reducing the plant's power."

focus of the NEI initiative is steam generator integrity.

## **Epri Water Chemistry Guideline**

EPRI is updating and expanding a mid-1990s guidance document for improving chemistry control within open cooling water chemistry systems. The new document, which will include guidance for both nuclear and fossil plants, will be available by the end of 2012. The previous guideline, Service Water System Chemical Addition Guideline (EPRI report TR-106229), provided information related to selection and application of treatment

chemicals in service water systems.

## **Chemical Addition Guideline - EPRI**

review in 1999. The NRC has indicated that operation in compliance with the EPRI Water Chemistry Guidelines is an important factor in deferring inspections. Compliance in cases such as this refers to Section 4.3 Guidelines Values for Control Parameters. The control parameters that affect IGSCC include ECP, conductivity, sulfate and chloride.
