Teaching

What if everything you knew about education was wrong? is just a title. Of course, you probably think a great many things that aren't wrong. The aim of the book is to help you 'murder your darlings'. David Didau will question your most deeply held assumptions about teaching and learning, expose them to the fiery eye of reason and see if they can still walk in a straight line after the experience. It seems reasonable to suggest that only if a theory or approach can withstand the fiercest scrutiny should it be encouraged in classrooms. David makes no apologies for this; why wouldn't you be sceptical of what you're told and what you think you know? As educated professionals, we ought to strive to assemble a more accurate, informed or at least considered understanding of the world around us. In Part 1; 'Why we're wrong', David dismantles what we think we know; examining cognitive traps and biases, assumptions, gut feelings and the problem of evidence. Part 2 delves deeper - 'Through the threshold' - looking at progress, liminality and threshold concepts, the science of learning, and the

While Part 4 challenges us to consider 'What else might we be getting wrong?'; cogitating formative assessment, lesson observation, grit and growth, differentiation, praise, motivation and creativity.
