A heat exchanger cooling system is a "closed" system where fresh water or an antifreeze type coolant circulates inside the engine. This system is similar to a car engine where the antifreeze in the radiator is circulated through the engine. This unit features a Farymann Diesel 18W diesel engine, water-cooling w/ replaceable water jacket, automatic decompression, direct injection, fuel transfer pump, exhaust elbow w/ water injection, brushless generator end, air intake silencer, stainless ...
