Gore is adding to it's range of affinity chromatography devices with the larger 9.0 mL size device for applications in process development, pre-clinical and early clinical drug development. This launch is significant because it demonstrates that this innovative membrane technology can be scaled to larger sizes without losing performance benefits.

FOCUSED INNOVATIONS IN LIFE SCIENCES. FOCUSED INNOVATIONS IN LIFE SCIENCES. Gore first entered the Life Sciences industry in the mid-1970s with a life-saving blood vessel replacement engineered to work in harmony with the body's own tissues. The attributes and performance characteristics of polytetrafluoroethylene (PTFE), the fluoropolymer at the core of Gore's product portfolio, made an ideal material for replacing human blood vessels.
