Mims graduated from Texas A&M University in 1966 with a major in government and minors in English and history.

Getting Started in Electronics by Forrest M. Mims III

For me, the whole thing started with curiosity. I was curious how you could make a light blink. And I was really curious about what people meant when they said computers were made of 1's and 0's. University is NOT a Requirement. I really want to help people getting started in electronics. Without having to attend university. Don't get me ...

Getting Started In Electronics - Build Electronic Circuits

BASIC THINGS YOU'LL NEED TO GET STARTED. Believe it or not you don't have to run out and buy a \$1,000 oscilloscope or a bunch of fancy equipment to get started here. In fact, I'd recommend that you not dump a ton of money into this kind of stuff until you know for sure if you like the hobby. A GOOD WORK SPACE

What you want to do first is to find yourself some gravel. Gravel is commonly found near water sources or underwater. Dig it up over and over, until you get flint. You will want to take that flint to a "hard" block (stone, bricks, etc.) and right-click on the top surface of said block to break it into flint shards.

But we'll definitely get into detail with that so that you're comfortable making the sponge cakes 3. Sponge Cake Mise en Place: When you're making sponge cakes, you'll most likely come across recipes where you're going to have to separate your eggs. So for this process, you'll need two bowls, one for whites and one for yolks.
