Lots of investment opportunities have come and gone. Now is the time for cryptocurrencies, so do not miss the boat. The block chain is an online decentralised public ledger of all digital transactions that have taken place. It is digital currency's equivalent of a high street bank's ledger that records transactions between two parties. Just as our modern banking system couldn't function without the means to record the exchanges of fiat currency between individuals, so too could a digital network not function without the trust that comes from the ability to accurately record the exchange of digital currency between parties. It is decentralised in the sense that, unlike a traditional bank which is the sole holder of an electronic master ledger of its account holder's savings the block chain ledger is shared among all members of the network and is not subject to the terms and conditions of any particular financial institution or country. The potential of the block chain to improve the way we communicate, bank, manage our assets etc is huge and only limited by the imagination of people in the Crypto Community and the willingness of current institutions to change. This book will open your eyes and help you understand the cryptocurrency future that is going to inevitably come!

Why is crypto crashing? Will bitcoin prices ever recover? Here's what traders and investors say. Don't call it a crash. Bitcoin is falling, but it's an asset known for volatile periods. Its current slump isn't pegged to one single event or piece of news but was instead being blamed on fear, uncertainty and doubt, or FUD, in the parlance of crypto traders. Over the course of the past 11 years, bitcoin has seen more than 750 instances where prices saw a daily change of 5% or greater, more than 230 instances in which it swung by at least 10% and nearly 50 times that it has moved by at least 20%, according to Dow Jones Market Data. Now this book on a safe-side unravel the reasons behind the recent dip and explains
