Chemistry - The IB Bookshop  
So I purchased the HL Chemistry book, 3rd Edition by John Green and Sadru Damji, however I can't find the answers for the questions in the book I was wondering if any of you had a link to a PDF of the answers! ... IB chemistry HL help (URGENT) What IB subjects should I choose? ...

This text has been produced independently as a resource to support the teaching of the Chemistry course of the International Baccalaureate. The examples and questions do not necessarily reflect the views of the official senior examining team appointed by the International Baccalaureate Organisation. The statements from the IB syllabus are reproduced with the permission of the IBO ... Those familiar with this will find a close correlation between the order in which the book deals with topics and the order in which they appear in the syllabus. The text is accompanied by a series of exercises, most of which have accompanying answers, making this a useful resource for self-study to reinforce normal classroom teaching.-Foreword.

The first IUPAC Manual of Symbols and Terminology for Physicochemical Quantities and Units (the Green Book) of which this is the direct successor, was published in 1969, with the object of 'securing clarity and precision, and wider agreement in the use of symbols, by chemists in different countries, among physicists, chemists and engineers, and by editors of scientific journals'. Subsequent revisions have taken account of many developments in the field, culminating in the major extension and revision represented by the 1989 edition under the simplified title Quantities, Units and Symbols in Physical Chemistry. This 2007, Third Edition, is a further revision of the material which reflects the experience of the contributors with the previous editions. The book has been systematically brought up to date and new sections have been added. It strives to improve the exchange of scientific information among the readers in different disciplines and across different nations. In a rapidly expanding volume of scientific literature where each discipline has a tendency to retreat into its own jargon this book attempts to provide a readable compilation of widely used terms and symbols from many sources together with brief understandable definitions. This is the definitive guide for scientists and organizations working across a multitude of disciplines requiring internationally approved nomenclature.

Chemistry for the IB Diploma, Second edition, covers in full the requirements of the IB syllabus for Chemistry for first examination in 2016. This digital version of Chemistry for the IB Diploma Coursebook, Second edition, comprehensively covers all the knowledge and skills students need during the Chemistry IB Diploma course, for first examination in 2016, in a reflowable format, adapting to any screen size or device. Written by renowned experts in Chemistry teaching, the text is written in an accessible style with international learners in mind. Self-assessment questions allow learners to track their progress, and exam-style questions help learners to prepare thoroughly for their examinations. Answers to all the questions from within the Coursebook are provided.

Discusses the reckless annihilation of fish and birds by the use of pesticides and warns of the possible genetic effects on humans.
