India: extreme inequality in numbers | Oxfam International

58 years later, India-China relationship has changed. Inequality has grown. To regain global stature, India has to continue to focus on its domestic economic capability and human capital. There are no short cuts to global power and influence. Written by Sanjaya Baru | Updated: October 21, 2020 8:10:58 am.

58 years later, India-China relationship has changed ...

The most significant feature of the results in Table 3 is that the between-group contributions to inequality, with respect to region, were considerably higher in China than they were in India: using GE(0) as the index of decomposition, 19% of overall inequality in China, but only 3% in India, could be 'explained' by differences in mean income between regions. By contrast, 9% of income inequality in India, compared to 1% in China, could be explained by differences in the educational ...
