## *International Building Code Chapter 16*

About this chapter:

### Chapter 16

establishes minimum design requirements so that the structural components of buildings are proportioned to resist the loads that are likely to be encountered. In addition, this chapter

# Online Library International

Assigns buildings and structures to risk categories that are indicative of their intended use.

## International Building Code Residential Code?

Chapter 16 Part  
3 File Type

brings uniformity to the construction of one- and two-family dwellings and townhouses. A comprehensive code for building design, this book brings together all building, plumbing, mechanical, and fuel gas provisions. It

# Online Library International

Establishes minimum regulations using prescriptive provisions, and is founded on broad-based principles that make possible the use of materials and building designs.

This comprehensive code comprises all building, plumbing, mechanical, fuel gas

# Online Library International

Building Code  
Chapter 16 Part  
3 File Type

and electrical requirements for one- and two-family dwellings and townhouses up to three stories. The IRC contains many important changes such as: An updated seismic map reflects the most conservative Seismic Design Category (SDC) based on any soil

# Online Library International

Building Code  
Chapter 16 Part  
3 File Type

type and a new map reflects less conservative SDCs when Site Class A, B or D is applicable.

The townhouse separation provisions now include options for using two separate fire-resistant-rated walls or a common wall. An emergency escape and rescue opening is no longer

# Online Library International

required in basement  
sleeping rooms where  
the dwelling has an  
automatic fire  
sprinkler system and  
the basement has a  
second means of  
egress or an  
emergency escape  
opening. The  
exemption for  
interconnection of  
smoke alarms in  
existing areas has

# Online Library International

been deleted. New girder/header tables have been revised to incorporate the use of #2 Southern Pine in lieu of #1 Southern Pine. New tables address alternative wood stud heights and the required number of full height studs in high wind areas.

# Online Library International

"The book provides a 28-step process that is organized according to the three phases of architectural design: schematic design, design development, and construction documents"--

Learn the requirements needed to instill safety and

# Online Library International

stability in existing  
and historic buildings  
- without requiring full  
compliance with the  
new construction  
requirements in the  
building code. The
