This revised edition of the landmark text includes the latest tests and treatments for those who are experiencing unexplained IVF failure, recurrent miscarriage, or long term infertility. An over activated immune response to pregnancy and blood clotting problems are now being identified in women with these previously "unexplained" conditions. Over half of fertility centers now recommend immune evaluation for women with a history of loss or two or more IVF failures. Centers that specialize in reproductive immunology are seeing success rates of over 85% within three cycles and even saving some couples from expensive and often futile IVF treatment. A fully updated list of all these centers, in the US and abroad, is provided in this book, making this a vital resource for all couples considering fertility treatment and looking for the best options in their area.

According to this reference from a leading authority who has worked with more than 7,000 couples, women who have experienced difficulty conceiving or multiple miscarriages may be suffering from treatable dysfunctions of their immune systems. Providing details that are both technical and accessible, this book explains how chemical therapy can temporarily regulate immune responses that might otherwise unleash natural killer cells. Sections cover the most common and adverse immune problems, including tissue compatibility, blood clotting defects, and antibodies that fight sperm, fetal cells, hormones, and neurotransmitters, and also outline clinical protocol for comprehensive immune testing. The discussion incorporates the author's own dramatic account of his clinical breakthroughs, the rejection of his ideas by mainstream medical practitioners, and his research showing that failed in vitro fertilization (IVF), infertility, and repeated miscarriages are often the result of abnormal immune reactions.

Recounts the author's battle with Lyme disease, including the initial misdiagnoses, the disease's toll on her family and career, and how she found spiritual, emotional, and physical enlightenment, along with an overview of the disease.

A memoir of hope for the thousands of women struggling with infertility, from one who beat the odds by simply tuning in to her body and tapping her well of sheer determination. At a time when more and more women are trying to get pregnant at increasingly advanced ages, fertility specialists and homeopathic researchers boast endless treatment options. But when Julia Indichova made the rounds of medical doctors and nontraditional healers, she was still unable to conceive a child. It was only when she forsook their financially and emotionally draining advice, turning inward instead, that she finally met with reproductive success. Inconceivable recounts this journey from hopeless diagnoses to elated motherhood. Anyone who has faced infertility will relate to Julia ' s desperate measures: acupuncture, unidentifiable black-and-white pellets, herb soup, foul-smelling fruit, even making love on red sheets. Five reproductive endocrinologists told her that there was no documented case of anyone in her hormonal condition getting pregnant, forcing her to finally embark on her own intuitive regimen. After eight caffeine-free, nutrient-rich, yoga-laden months, complemented by visualization exercises, Julia received amazing news: incredibly, she was pregnant. Nine months later she gave birth to a healthy girl. Unlike the many infertility books that take a clinical " how to " approach, Inconceivable simply professes the wisdom of giving expert status back to the patient. Julia ' s self-discovery, and her ability to see her body as an ally once again, yield a beautiful message about the importance of honoring the body ' s innate powers, and the power of life itself.

Reproductive Immunology: Basic Concepts gives a holistic insight into the understanding of the complex interactions between the maternal immune system and the fetal/placental unit necessary for the success of pregnancy. This interaction is critical for the support of the human fetal semiallograft and the protection against infections. The book covers various topics such as B cells, macrophages, T cells, discussion on fetal signals and their impact on maternal reproductive cells such as endometrial cells, mast cells, and the role of fetal Hofbauer cells. The immune regulatory role of glucorticoids, and many other novel topics within the field of reproductive immunology. Edited and written by experts in the field, this book introduces the up-to-date knowledge of the role of the immune system during pregnancy and provides the necessary background to understand pregnancy complications associated with alterations in the functioning of the immune system. The book provides a complete discussion on the immunological aspects of pregnancy and serves as a great tool for research scientists, students, reproductive immunologists and OBGYNs. Shows the detailed evaluation of the knowledge related to each immune cell type in the pregnant and not pregnant uterus Evaluates each immune cell type and its function during specific reproductive events Provides the biological background for understanding the clinical aspects that will be discussed in subsequent volumes in the series

Zita West, midwife to Cate Blanchett, Stella McCartney and Kate Winslet, shares her expertise in nutrition to help you and your baby stay healthy naturally throughout your pregnancy. It is crucial to eat an optimum diet during pregnancy. Your levels of nutrients need to be high in order to support you through the process of pregnancy, and the baby that you ' re carrying inside of you needs the full range of nutrients to be as healthy as possible. It can be difficult and tiring to make nutrient-filled meals, but Zita gives you clear information and simple, easy-to-make recipes. The first section of the book covers details such as what nutrients are important and what they do for you and your baby, and foods that are unhealthy to consume during pregnancy. The second section uses the vitamins and nutrients explained in the first section in 80 delicious recipes. Introduction Your Health (nutrients your body needs as it changes, sources of these nutrients, foods that help with the side effects of pregnancy, the importance of safe exercise) Your Baby ' s Health (nutrients your baby needs to grow, what they do, sources of these nutrients) What to Avoid (foods not to eat why they are bad for you and your baby) Breakfasts Light Meals Snacks and Treats Main Meals Desserts.

A practical and evidence-backed approach for improving egg quality and fertility — fully revised and updated in 2019. The latest scientific research reveals that egg quality has a powerful impact on how long it takes to get pregnant and the risk of miscarriage. Poor egg quality is in fact the single most important cause of age-related infertility, recurrent miscarriage, and failed IVF cycles. Based on a vast array of scientific research, It Starts with the Egg provides a comprehensive program for improving egg quality in three months, with specific advice tailored to a variety of fertility challenges— including endometriosis, unexplained infertility, diminished ovarian reserve, PCOS, and recurrent miscarriage. With concrete strategies such as minimizing exposure to common toxins, choosing the right vitamins and supplements to safeguard developing eggs, and harnessing nutritional advice shown to boost IVF success rates, this book offers practical solutions that will help you get pregnant faster and deliver a healthy baby.

Infertility is a heartbreaking condition that affects nine million American couples each year. It causes tremendous stress, can trigger debilitating sadness and depression, and can tear a marriage to shreds. In Conquering Infertility, Harvard psychologist Alice Domar—whom Vogue calls the " Fertility Goddess " —provides infertile couples with what they need most: stress relief, support, and hope. Using the innovative mind/body techniques she has perfected at her clinic, Domar helps infertile women not only regain control over their lives but also boost their chances of becoming pregnant. With Conquering Infertility, women learn how to cope with infertility in a much more positive way and to carve a path toward a rich, full, happy life.

From the expert team behind IT'S PERFECTLY NORMAL and IT'S SO AMAZING! comes a book for younger children about their bodies — a resource that parents, teachers, librarians, health care providers, and clergy can use with ease and confidence. Young children are curious about almost everything, especially their bodies. And young children are not afraid to ask questions. What makes me a girl? What makes me a boy? Why are some parts of girls' and boys' bodies the same and why are some parts different? How was I made? Where do babies come from? Is it true that a stork brings babies to mommies and daddies? IT'S NOT THE STORK! helps answer these endless and perfectly normal questions that preschool, kindergarten, and early elementary school children ask about how they began. Through lively, comfortable language and sensitive, engaging artwork, Robie H. Harris and Michael Emberley address readers in a reassuring way, mindful of a child's healthy desire for straightforward information. Two irresistible cartoon characters, a curious bird and a squeamish bee, provide comic relief and give voice to the full range of emotions and reactions children may experience while learning about their amazing bodies. Vetted and approved by science, health, and child development experts, the information is up-to-date, age-appropriate, and scientifically accurate, and always aimed at helping kids feel proud, knowledgeable, and comfortable about their own bodies, about how they were born, and about the family they are part of.

The world of fertility treatments has changed substantially in less than a decade. Much like computer technology, software, cell phones, and even the music industry, the field of fertility science is transforming at a stunning rate. What was considered standard care and treatment only six or seven years ago is now thought of as " old school " and passé. In Your Fertility. Your Family., a world-renowned fertility provider offers the latest treatment template used to diagnose and overcome fertility challenges. Dr. William Schoolcraft and his team of clinicians address the latest causes and treatment plans for age-related infertility, recurrent miscarriage, and failed IVF cycles. The growing CCRM team tackles new treatments and options that have emerged and are expected to develop over the next decade. Ideal for both mainstream audiences interested in family planning and fertility, as well as medical professionals in the field, Your Fertility. Your Family. promises to be a fascinating and illuminating read.
