ABOUT THE BOOK Jeff Atwood began the Coding Horror blog in 2004, and is convinced that it changed his life. He needed a way to keep track of software development over time - whatever he was thinking about or working on. He researched subjects he found interesting, then documented his research with a public blog post, which he could easily find and refer to later. Over time, increasing numbers of blog visitors found the posts helpful, relevant and interesting. Now, approximately 100,000 readers visit the blog per day and nearly as many comment and interact on the site. Effective Programming: More Than Writing Code is your one-stop shop for all things programming. Jeff writes with humor and understanding, allowing for both seasoned programmers and newbies to appreciate the depth of his research. From such posts as "The Programmer's Bill of Rights" and "Why Can't Programmers... Program?" to "Working With the Chaos Monkey," this book introduces the importance of writing responsible code, the logistics involved, and how people should view it more as a lifestyle than a career. TABLE OF CONTENTS - Introduction - The Art of Getting Shit Done - Principles of Good Programming - Hiring Programmers the Right Way - Getting Your Team to Work Together - The Batcave: Effective Workspaces for Programmers - Designing With the User in Mind - Security Basics: Protecting Your Users' Data - Testing Your Code, So it Doesn't Suck More Than it Has To - Building, Managing and Benefiting from a Community - Marketing Weasels and How Not to Be One - Keeping Your Priorities Straight EXCERPT FROM THE BOOK As a software developer, you are your own worst enemy. The sooner you realize that, the better off you'll be. I know you have the best of intentions. We all do. We're software developers; we love writing code. It's what we do. We never met a problem we couldn't solve with some duct tape, a jury-rigged coat hanger and a pinch of code. But Wil Shipley argues that we should rein in our natural tendencies to write lots of code: The fundamental nature of coding is that our task, as programmers, is to recognize that every decision we make is a trade-off. To be a master programmer is to understand the nature of these trade-offs, and be conscious of them in everything we write. In coding, you have many dimensions in which you can rate code: Brevity of code Featurefulness Speed of execution Time spent coding Robustness Flexibility Now, remember, these dimensions are all in opposition to one another. You can spend three days writing a routine which is really beautiful and fast, so you've gotten two of your dimensions up, but you've spent three days, so the "time spent coding" dimension is way down. So, when is this worth it? How do we make these decisions? The answer turns out to be very sane, very simple, and also the one nobody, ever, listens to: Start with brevity. Increase the other dimensions as required by testing. I couldn't agree more. I've given similar advice when I exhorted developers to Code Smaller. And I'm not talking about a reductio ad absurdum contest where we use up all the clever tricks in our books to make the code fit into less physical space. I'm talking about practical, sensible strategies to reduce the volume of code an individual programmer has to read to understand how a program works. Here's a trivial little example of what I'm talking about: `if (s == String.Empty) if (s == "")` It seems obvious to me that the latter case is... ..buy the book to read

Two years ago, the aliens made contact. Now Cara Sweeney is going to be sharing a bathroom with one of them. Handpicked to host the first-ever L'eihr exchange student, Cara thinks her future is set. Not only does she get a free ride to her dream college, she'll have inside information about the mysterious L'eihrs that every journalist would kill for. Cara's blog following is about to skyrocket. Still, Cara isn't sure what to think when she meets Aelyx. Humans and L'eihrs have nearly identical DNA, but cold, infuriatingly brilliant Aelyx couldn't seem more alien. She's certain about one thing though: no human boy is this good-looking. But when Cara's classmates get swept up by anti-L'eihr paranoia, Midtown High School suddenly isn't safe anymore. Threatening notes appear in Cara's locker, and a police officer has to escort her and Aelyx to class. Cara finds support in the last person she expected. She realizes that Aelyx isn't just her only friend; she's fallen hard for him. But Aelyx has been hiding the truth about the purpose of his exchange, and its potentially deadly consequences. Soon Cara will be in for the fight of her life—not just for herself and the boy she loves, but for the future of her planet.

"When my dragons are grown, we will take back what was stolen from me and destroy those who wronged me! We will lay waste to armies and burn cities to the ground! Daenerys Targaryen Dragons are massive, flying reptiles which can breathe fire onto their enemies and cook their food with the same flame. They are rumored to have a strong connection to magic, which seems to be proven true when magic begins to return to the world after the birth of the first three in over two hundred years. Dragons possess awesome and devastating power, capable of laying waste to armies and burning entire cities to ashes. Men who were able to tame and ride dragons as beasts of war used them to burn their enemies and forge vast empires across the continents of Essos and Westeros. Tools and material you'll need 1 Craft Knife (X-Acto knife) 2 Scissors 3 White glue 4 12" Ruler 5 Color markers or pencils 6 Tweezers 7 Paint brush Useful tips - Completely read these instructions before cutting. Make sure you understood all instructions steps - Detach parts carefully as they are needed - Avoid over application of glue! This may cause paper to wrinkle. Use a paint brush to apply glue on parts - In some parts, you'll notice some white areas and yellow lines showing how pieces should line up when glued - When you cut paper, white edges will be apparent. Use a marker or pencil to color these edges, before gluing them - Mountain fold means printed surface should be on the outside - Valley fold means printed surface should be on the inside - When building, be sure the glue dries completely before proceeding to the next step - When joining opened parts, like partial cones and cylinders, start gluing two tabs. - - --- When completely dry, glue remaining tabs - There is an edge where you close the cylinder or cone. Let's call it the guide edge. - --- - Use this guide edge as an alignment mark when glueing one part to another. - Cut some stripes from textures file to hide some joints Difficulty level: medium NUMBER OF PARTS: 258 SCALE: 1/30 SIZE (CM): 72 x 50 x 22 (L x W x H) SIZE (in): 28.3 x 19.6 x 8.6 (L x W x H) The set includes: working sheets 14 pcs. + Assembly instruction. Note: this model is necessary to collect itself. In the photo the finished model. Why do you need to buy this paper model?: 1. For all fans of the Game of Thrones. This is an excellent opportunity to have at home an exact copy of the Most Famous Drogon. 2. Excellent pastime. This is an anti-stress for you and your loved ones. This build of the model develops assiduity and attention. 3. Not a high price for a personal Drogon at home: -) 4. Your relatives and friends will admire your achievements. And they want to have the same one too. It is possible to collect under painting. Attention! The kit does not include glue and scissors!

"Morbid and illuminating" (Entertainment Weekly)—a young mortician goes behind the scenes of her curious profession. Armed with a degree in medieval history and a flair for the macabre, Caitlin Doughty took a job at a crematory and turned morbid curiosity into her life's work. She cared for bodies of every color, shape, and affliction, and became an intrepid explorer in the world of the dead. In this best-selling memoir, brimming with gallows humor and vivid characters, she marvels at the gruesome history of undertaking and relates her unique coming-of-age story with bold curiosity and mordant wit. By turns hilarious, dark, and uplifting, *Smoke Gets in Your Eyes* reveals how the fear of dying warps our society and "will make you reconsider how our culture treats the dead" (San Francisco Chronicle).

100 pages of blank music manuscript paper, 12 staves on each page, with the book sized 8.5 x 11 in (21.6 x 28 cm). All pages are free from branding and clefs, so nothing gets in the way of your musical compositions. Ideal size for writing and reading. Perfect for musicians of all ages and levels.
