A major barrier to the introduction of ferroelectric devices into mass markets remains their limited reliability due to fatigue. The underlying physical and chemical mechanisms of this material fatigue phenomenon are extremely complex, and the relevant influences range from single-point defects to macroscopic boundary conditions. This book summarizes the different aspects of fatigue in ferroelectrics. It is primarily concerned with bulk material effects. Mechanical, electrical, and physico-chemical processes are described; reference data are given for different loading regimes and boundary conditions; and various fatigue models are compared. The monograph also demonstrates how the results of acoustic emission and of microscopy studies reveal the microscopic origins of fatigue in ferroelectric devices.

Pro Android 4 shows you how to build real-world and fun mobile apps using the new Android SDK 4 (Ice Cream Sandwich), which unifies Gingerbread for smartphones, Honeycomb for tablets and augments further with Google TV and more. This Android 4 book updates the best selling Pro Android 3 and covers everything from the fundamentals of building apps for embedded devices, smartphones, and tablets to advanced concepts such as custom 3D components, multi-tasking, sensors/augmented reality, better accessories support and much more. Using the tutorials and expert advice, you'll quickly be able to build cool mobile apps and run them on dozens of Android-based smartphones. You'll explore and use the Android APIs, including those for media and sensors. And you'll check out what's new with Android 4, including the improved user interface across all Android platforms, integration with services, and more. After reading this definitive tutorial and reference, you gain the knowledge and experience to create stunning, cutting-edge Android 4 apps that can make you money, while keeping you agile enough to respond to changes in the future.

A memory of love... On her return to the present from a time-travel journey to sixteenth-century Calais, France, college co-ed Arielle Lloyd anticipates a joyful welcome from her immortal fiancé, Sebastian Gaulle. She is stunned to discover that he doesn't remember their time together there and wonders, has she lost him forever? Danger from afar... As Sebastian tries to shake loose his disturbing memories and solve the enigma of Arielle's haunting eyes, the Russian Mafia ups the stakes in their deadly game to steal crucial documents from his company. Then an envelope arrives with photos of Arielle. The message is clear: if Sebastian fails to meet their demands, his love will pay the price with her life. A love across all time... Sebastian and his associates join forces with Interpol in a race to thwart the Russians' plans. In the global battle, the Russians have made a serious mistake. They have threatened the beloved of an indestructible immortal, a woman Sebastian only now realizes he has loved across the centuries."

Are kids going to love this book? Is a frog waterproof? The latest title in the popular Strange and Wonderful series delivers the awe-inspiring variety of frogs, the world's hoppiest amphibians. Did you know that the Goliath frog is more than a foot long? Or that the tiny gold frog could sit on a dime? Some frogs have camouflage. Others wear bold colors warning their enemies that they are poisonous. Some frogs leap, others hop, one is a runner, and a few glide from tree to tree with their big, webbed hands and feet! Surprising facts and beautiful, realistic nature illustrations come together in this celebration of one of nature's most fascinating marvels.

Sixteen-year-old Hope must defend her developmentally disabled brother (who has not spoken a word since he was 7 years old) when he is accused of murdering a beloved high school baseball coach.

City Maps Yinchuan China is an easy to use small pocket book filled with all you need for your stay in the big city. Attractions, pubs, bars, restaurants, museums, convenience stores, clothing stores, shopping centers, marketplaces, police, emergency facilities are only some of the places you will find in this map. This collection of maps is up to date with the latest developments of the city as of 2017. We hope you let this map be part of yet another fun Yinchuan adventure :)

Historically, Filipina/o Americans have been one of the oldest and largest Asian American groups in the United States. In this pathbreaking work of historical scholarship, Dorothy B. Fujita-Rony traces the evolution of Seattle as a major site for Philippine immigration between World Wars I and II and examines the dynamics of the community through the frameworks of race, place, gender, and class. By positing Seattle as a colonial metropolis for Filipina/os in the United States, Fujita-Rony reveals how networks of transpacific trade and militarism encouraged migration to the city, leading to the early establishment of a Filipina/o American community in the area. By the 1920s and 1930s, a vibrant Filipina/o American society had developed in Seattle, creating a culture whose members, including some who were not of Filipina/o descent, chose to pursue options in the U.S. or in the Philippines. Fujita-Rony also shows how racism against Filipina/o Americans led to constant mobility into and out of Seattle, making it a center of a thriving ethnic community in which only some remained permanently, given its limited possibilities for employment. The book addresses class distinctions as well as gender relations, and also situates the growth of Filipina/o Seattle within the regional history of the American West, in addition to the larger arena of U.S.-Philippines relations.

"Gray weaves a fascinating tale about one of the twentieth century's greatest unsolved mysteries. It's a page-turner. --USA Today"--Cover page 4.

Understanding human dynamics is an essential aspect of planning for success across the full spectrum of military and national security operations. While the adage that "warfare is political conflict by other means" is widely recognized, combatants who underestimate the impact of the human element in military operations do so at their risk. During the Second World War and the reconstruction that followed, as well as during the Cold War, understanding human dynamics was considered essential. Although, the U.S. military belatedly increased its human dynamics awareness within the current Iraq and Afghanistan theaters, recent progress has been achieved because of its importance in strategic, operational, and tactical decision-making. The U.S. military has also made recent progress in training and sensitizing deployed U.S. forces to the importance of understanding human dynamics in dealing with individuals, groups, and societies. There have been numerous, though mostly uncoordinated, efforts within DoD to manage relevant databases and provide associated tools and cultural advisors. To a large extent, these efforts recapitulate "lessons learned and since forgotten" from prior engagements—capabilities that were permitted to lapse and were no longer organic to DoD. Substantial improvements by DoD are needed in understanding human dynamics. In particular, DoD must take a longer-term view and build upon increased capability achieved in Iraq and Afghanistan. It must institutionalize the best of current programs and processes so that this capability is also available across the full spectrum of military operations, including increased emphasis on activities, referred to as Phase 0, that seek to mitigate the likelihood of armed conflict. To be effective in the long term, DoD must develop more coherence in its efforts to enhance human dynamics awareness. Most importantly, capability must be expanded beyond the focus of current armed conflicts so that the Department and military services have the flexibility to adjust rapidly to events in other places in the world. Playing "catch-up" will not be an effective option.
