understanding the essential but often challenging areas of ethics theories, principles, codes, and rights, and insightfully illustrates how these concepts are integrated. Administration Ethics goes beyond academic debate and enters the daily practice of health administration. It examines the psychology of decision making, revealing how we sometimes make well-intentioned, but unethical decisions. Each chapter includes illustrative cases pertinent to the ethical management and policy decisions required of healthcare administrators. Featuring a new, user-friendly decision model and designed specifically with the Canadian healthcare system in mind, this volume will be an indispensable resource for both current and future healthcare administrators in Canada.
