ENVIRONMENTAL SCIENCE inspires and equips students to make a difference for the world. Featuring sustainability as their central theme, authors Tyler Miller and Scott Spoolman emphasize natural capital, natural capital degradation, solutions, trade-offs, and the importance of individuals. As a result, students learn how nature works, how they interact with it, and how humanity has sustained and can continue to sustain its relationship with the earth by applying nature's lessons to economics and individual lifestyles. Engaging features like Core Case Studies, and Connections boxes demonstrate the relevance of issues and encourage critical thinking. Updated with new learning tools, the latest content, and an enhanced art program, this highly flexible book allows instructors to vary the order of chapters and sections within chapters to meet the needs of their courses. Two new active learning features conclude each chapter. Doing Environmental Science offers project ideas based on chapter content that build critical thinking skills and integrate scientific method principles. Global Environmental Watch offers online learning activities through the Global Environment Watch website, helping students connect the book's concepts to current real-world issues. An integrated approach to understanding how people live, learn, work in and perceive their environments.

Winner of the Francis Parkman Prize Changes in the Land offers an original and persuasive interpretation of the changing circumstances in New England's plant and animal communities that occurred with the shift from Indian to European dominance. With the tools of both historian and ecologist, Cronon constructs an interdisciplinary analysis of how the land and the people influenced one another, and how that complex web of relationships shaped New England's communities.

This work develops the concept of 'emotional health' as the presence of a bio-psycho-socio-cultural balance. Modern lives contain constant social, political and economic challenges, as well as ecological emergencies. All of these can be causes of stress, leading to poor health and mental illness. This book serves to build the bridge between medical treatments with alternative and complementary medicine, as well as therapies, in order to highlight a bio-psycho-socio-cultural approach which can help us to find new solutions to these health problems. This book introduces the concept of planetary health, develops the concept of 'bio-psycho-socio-cultural balance', and defines the concepts which make up this balance.
