Lucretius De Rerum Natura
Summary - McGoodwin

That world does things in order:
things have their seeds, and
nothing is ever destroyed utterly.
Atoms are imperceptible, so
Lucretius must also prove the
existence of invisible particles.

only known work is the philosophical poem De rerum natura, a didactic work about the tenets and philosophy of Epicureanism, and which usually is translated into English as On the Nature of Things. Lucretius has been credited with originating the concept of the three-age system that was formalised in 1836 by C. J. Thomsen. Very little is known about Lucretius's life; the only certain fact is, that he was either a friend or client of Gaius

Body comes in minute and physically indivisible portions, atoms—although Lucretius does not use this Greek loan-word, and prefers a series of circumlocutions such as ‘ first beginnings of things ’ (primordia rerum), ‘ seeds ’, and ‘ matter ’ (materies, derived from mater, ‘ mother ’), which serve his poetic purposes by evoking the creative powers of these primary particles. It is by their combination into complex structures that all phenomenal beings are generated.
