Mikuni Carburetors. Some of the Mikuni carburetors for motorcycles in the market include: 1) Mikuni HSR 42MM. This carburetor promises to help your engine reach its full potential. The compact design fits like stock and employs a simple bolt-on application. It comes with instructions so you need not worry about being able to bolt it on.

Mikuni Carb Identification: How to tell which one you have

the metal elbow at the carburetor end of the cable assembly (see Installation Instructions). Harley 's cable is stiff and can fail to fully seat in the elbow. This condition results in poor mileage and a poor idle. The Mikuni choke cable is more flexible and less likely to jam. Still, it is best to check to be sure the cable is installed ...

REV Tuning Manual 120302 - Mikuni Corporation

Mikuni 's HS40 carburetor is fitted with an accelera-tor pump. The purpose of the pump is to inject fuel into the throat of the HS40 when the throttle is opened. As the throttle is opened, especially at low rpm, air velocity through the carburetor drops and the mixture naturally becomes leaner. Fuel from the pump maintains a more correct fuel/air

Mikuni HS40

Includes 42mm carb, airbox adapter, chrome cover, installation instructions and tuning manual. 42-18: 1999 to present Twin Cam models; 1990 to 1999 Big Twin Evo. Includes 42mm carb, air box adapter and instructions. Twin Cam uses the stock oval chrome cover.

Mikuni American Corporation

About half of Mikuni/Twin Cam installations have an interference between the cylinder fins and the float bowl of the HSR carburetor. A small portion of the cylinder fin material must be removed from both front and rear cylinders to clear the float bowl. Failure to make this modification can result in alignment and wear problems.
