This collection offers a critical examination of online language teacher education programs (OLTE), looking at a range of issues which have informed their development and the challenges and opportunities in their implementation from a TESOL perspective. Positioning itself uniquely amongst the growing literature at the nexus of technology and language learning, the book focuses on language teacher education programs designed for academic and professional credentials in online environments. Introductory sections provide a brief historical overview of the OLTEs as we know them today, with examples from a global range of programs toward demonstrating their theoretical and philosophical foundations. The second section of the book explores the paradigm shifts borne out of OLTE in the modes, media, and tasks employed and their subsequent impact on instructional efficacy. Subsequent chapters turn a critical lens on OLTE in raising questions around accessibility its implementation in less technologically developed environments, issues of quality measures and accreditation, and practicum concerns. Taken together, this collection is a state of the art of online language teacher education programs and lays the groundwork for future research on the nexus of online education, teacher education, and applied linguistics.

Technologies develop rapidly and reach hurricane levels of velocity but quality E-Content and innovative applications lag behind. This book addresses the question how content industries change within a digital environment and what role information and communication technologies play in transforming the competitive landscape. The authors argue that post-industrial societies tend to pay substantial amounts for equipment and gadgets but invest far too little in the quality of the content. As a result, much effort is and has to be spent on the enhancement of E-Content. The contributions give an elaborate overview of: - the specifics, challenges and prospects of content in the network economy; - market developments of digital media services; - paid content business models; - impacts on scientific publishing; - developments in the field of E-Learning; - the interplay between technology and content with the example of interactive digital TV; - the mobile games market; - emerging new cross media markets; - the need to enhance the usability of websites and mobile applications; - how digital applications might be used to capture and store our personal experiences. A final chapter shows the prospects of the European E-Content market and gives an overview of valuable initiatives and resources dealing with the topic of E-Content.

Technology is ubiquitous, and its potential to transform learning is immense. The first edition of Using Technology with Classroom Instruction That Works answered some vital questions about 21st century teaching and learning: What are the best ways to incorporate technology into the curriculum? What kinds of technology will best support particular learning tasks and objectives? How does a teacher ensure that technology use will enhance instruction rather than distract from it? This revised and updated second edition of that best-selling book provides fresh answers to these critical questions, taking into account the enormous technological advances that have occurred since the first edition was published, including the proliferation of social networks, mobile devices, and web-based multimedia tools. It also builds on the up-to-date research and instructional planning

framework featured in the new edition of Classroom Instruction That Works, outlining the most appropriate technology applications and resources for all nine categories of effective instructional strategies: * Setting objectives and providing feedback * Reinforcing effort and providing recognition * Cooperative learning * Cues, questions, and advance organizers * Nonlinguistic representations * Summarizing and note taking * Assigning homework and providing practice * Identifying similarities and differences * Generating and testing hypotheses Each strategy-focused chapter features examples--across grade levels and subject areas, and drawn from real-life lesson plans and projects--of teachers integrating relevant technology in the classroom in ways that are engaging and inspiring to students. The authors also recommend dozens of word processing applications, spreadsheet generators, educational games, data collection tools, and online resources that can help make lessons more fun, more challenging, and--most of all--more effective.

"This book provide relevant teacher-initiated theoretical frameworks and the latest empirical research findings in English language teaching that promotes English as the tool for global integration and communication"--

Reading & Writing with English Learners offers kindergarten through fifth grade reading and writing educators a user-friendly guide and framework for supporting English learners in balanced literacy classrooms. Authors Valentina Gonzalez and Melinda Miller lead readers in exploring the components of Reading & Writing with English Learners with a special eye for increasing the effectiveness of instructional methods and quality of instruction to serve English learners. This book shares practical and effective techniques for accommodating reading and writing instruction to design learning that simultaneously increases literacy and language development. Reading & Writing with English Learners was written for: •   K-5 Classroom Teachers • ESL Teachers •   Reading and Writing Instructional Coaches •   District Leaders Reading & Writing with English Learners includes: •   the components of Reading & Writing Workshop •   accommodations that support English Learners •   high yield practices for Reading & Writing Workshop during remote teaching •   the role of phonics •   a culturally inclusive booklist • activities that support Reading & Writing Workshop And more!

This volume offers insights on English language education policies in Middle Eastern and North African countries, through state-of-the-art reports giving clear assessments of current policies and future trends, each expertly drafted by a specialist. Each chapter contains a general description of English education polices in the respective countries, and then expands on how the local English education policies play out in practice in the education system at all levels, in the curriculum, in teaching, and in teacher training. Essays cover issues such as the balance between English and the acquisition of the national language or the Arabic language, as well as political, cultural, economic and technical elements that strengthen or weaken the learning of English. This volume is essential reading for researchers, policy makers, and teacher trainers for its invaluable insights in the role of each of the stakeholders in the implementation of policies.

Proceedings of the 15th European Conference on e- Learning (ECEL 2016)

In this book, we can read about new technologies that enhance training and performance; discover new, exciting ways to design and deliver content; and have access to proven strategies, practices and solutions shared by experts. The authors of this book come from all over the world; their ideas, studies, findings and experiences are beneficial contributions to enhance our knowledge in the field of e-learning. The book is divided into three sections, and their respective chapters refer to three macro areas. The first section of the book covers Instructional Design of E-learning, considering methodology and tools for designing e-learning environments and courseware. Also, there are examples of effective ways of gaming and educating. The second section is about Organizational Strategy and Management. The last section deals with the new Developments in E-learning Technology, emphasizing subjects like knowledge building by mobile e-learning systems, cloud computing and new proposals for virtual learning environments/platforms.

The expansion of theories and practices of Teaching English Language in India has been very prominent and conspicuous during the recent few years. For many, this mirrors the strength of contemporary second Language Teaching in the country. Development of new practices and ways of dealing with planning language projects and materials mirrors more proficient and more compelling methods of Language teaching. Teaching English Language depends on more extensive assortment of methodological alternatives adopted by language teachers. The language Teachers have adopted new practices, techniques and materials as per the requirements of students, the penchants of teachers, imperatives of the everyday schedule setting, and the COVID-19 situation. However, the wide assortment of theories and practices still bewilders rather than provides solace. Most importantly, some are confused by the absence of thorough theories of what practices, methodologies and techniques are to be adopted for the benefit of the learners. This book is brought out to address the present circumstance. It is an endeavor to portray, put together, organize and present contemporary theories and practices in language teaching.

Seminar paper from the year 2018 in the subject Communications - Multimedia, Internet, New Technologies, grade: 2,3, University of Trier, language: English, abstract: In the following, an internet based activity, namely the WebQuest, is going to be observed by analyzing possible risks and benefits and its importance on the very relevant teaching aim of media literacy and competences referring to that. Then, a concrete example of such a task will be shown and an overall conclusion will be drawn in order to answer the initial question of this paper of whether the method of WebQuests is a useful one or not. Additionally, this paper justifies its relevance by the fact that WebQuests were not originally designed for language learning, so that creating one possibly is a challenge but the outcome will hopefully be supporting with regards to developing future WebQuests for the actual usage concerning me being a teacher. Being a modern (English) language teacher means to include the various forms of information technology (IT) available in the 21st century such as computers or even interactive whiteboards. IT can now add valuable extra dimensions to teaching English as a foreign language. Consequently, the usage of IT can definitely improve English language teaching for various reasons. Besides providing teachers with current material for every topic and easily overcoming geographical distance in order to observe relevant cultural aspects of the target language or to interact with native speakers, it is fun and therefore motivating for the students. The main goal of foreign language teaching is the mediation of competences which enable the students to communicate and overcome the language barrier. Concerning possible problems and risks, the time consuming aspect of WebQuests cannot be disregarded. They demand time beforehand and even though they can save teacher's time in the long term, WebQuests need to be nurtured when they are expected to perform over a longer period of time. The hyperlinks providing the learners with the sources need to be checked from time to time which means that

WebQuests also need time in the long term.
