The story broke in 2006: Since 9/11, US intelligence services have had access to practically any international money transfer data by infiltrating the SWIFT (Society for Worldwide Interbank Financial Telecommunication) network. Banks worldwide transfer money orders and

personal customer data through this network. While the surveillance was all-embracing in 2001, it was gradually limited over the course of the last few years. Revealed by the New York Times, the SWIFT affair has had global as well as national implications. While this dissertation first examines the international dimension of the SWIFT surveillance, the analysis mainly focuses on the national repercussions for Switzerland. Ardit Prize 2010 in International Affairs.

A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform, www.oapen.org. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book traces the history and development of a mutual organization in the financial sector called SWIFT, the Society for Worldwide Interbank Financial Telecommunication. Over the last forty years, SWIFT has served the financial services sector as proprietary communications platform, provider of products and services, standards developer, and conference organizer ("Sibos"). Founded to create efficiencies by replacing telegram and telex (or 'wires') for international payments, SWIFT now forms a core part of the financial services infrastructure. It is widely regarded as the most secure trusted third party network in the world serving 212 countries and over 10,000 banking organizations, securities institutions and corporate customers. Through every phase of its development, SWIFT has maintained the status of industry cooperative thus presenting an opportunity to study broader themes of globalization and governance in the financial services sector. In this book the authors focus on how the design and current state of SWIFT was influenced by its historical origins, presenting a comprehensive account in a succinct form which provides an informative guide to the history, structure, activities and future challenges of this key international organization. This work will be of great interest to students and scholars in a wide range of fields including IPE, comparative political economy, international economics, business studies and business history.

"The Committee on Payment and Settlement Systems (CPSS) publishes - under the aegis of the Bank for International Settlements (BIS) - reference works on the payment systems and other financial market infrastructures of various countries, widely known as Red Books. The Red Book for the CPSS countries was last published in April 2003. After the enlargement of the CPSS to 24 countries in 2009, this edition of the Red Book for the CPSS countries is in two volumes"--Foreword.

The International Transactions in Remittance: Guide for Compilers and Users (RCG) presents concepts, definitions, and classifications related to remittances. It is consistent with the new standards for measuring balance of payments transactions, as contained in the sixth edition of the Balance of Payments and International Investment Position Manual (BPM6). These standards are used globally to compile comprehensive and comparable data. The RCG identifies the main remittances compilation methods currently being used by compilers and discusses in detail the strengths and weaknesses of each method. It is the first manual providing compilation guidance for remittances and is also the first compilation guide based on concepts set out in BPM6. Although the RCG is primarily aimed at remittances data compilers, it

may also be useful for users who wish to understand remittances data.

This book makes a practical contribution to increased understanding of payment system design and management and of the relationship between the payment system and monetary policy. The authors of the twelve papers included in the book are central banking experts from around the world who draw on their experiences in providing technical assistance to the central banks of the countries of the former U.S.S.R.
