This book presents the refereed proceedings of the Third International Conference on Intelligent Tutoring Systems, ITS '96, held in Montreal, Canada, in June 1996. The book contains 69 revised papers selected from a total of 128 submissions; also included are six invited papers from well-known speakers. All in all, the book reflects the state-of-the-art in the area. In particular the following topics are covered: advising systems, ITS architectures, cognitive models, design issues, empirical studies, formal models, learning environments, real-world applications, software tools for tutoring, student modelling, teaching and learning strategies, and multimedia and WWW.

Written by examiners and practising teachers, each book in this series contains activities and useful features intended to aid understanding. Knowledge is tested throughout, with progress checks at the end of every chapter and practice questions at the end of each section.

This student book provides material to teach and prepare students

for OCR 21st Century 2011 Additional Science GCSE with complete coverage of the specification modules B4, B5, B6, C4, C5, C6, and P4, P5, P6 which make up the Additional Science GCSE and the middle parts of the three separate science GCSEs. This book will provide you with complete coverage of the new OCR Twenty First Century Additional Science specification:- Plan and teach low-ability and high-achieving students with differentiated student book content laid out in clear, bitesize sections- Engage your students with content that is presented in a clear and fresh way- Establish and build on prior knowledge with a quick recap of KS3 and a direct link to the GCSE content that will follow at the start of each module- Build and apply the skills needed to understand and carry out controlled assessment- Show the relationship between module content to paint the bigger picture with the summary chart at the end of each module- Encourage students take responsibility for what they have learnt and need to develop by using the student-friendly module checklist that matches the specification- Help students improve to a higher grade with worked examples with explanations of how to improve and exam-style practise questions-This student book links to other components in Collins' OCR GCSE Sciences series as well as to other Collins GCSE Science resources- Capture the interest of students with activities exploring science in the media based on Bad Science by Ben Goldacre

This volume is the first of a series of two devoted to automorphic forms from a geometric and arithmetic point of view. They also deal with certain parts of the Langlands program. The themes treated in this volume include p -adic modular forms, the local Langlands correspondence for $GL(n)$, the cohomology of Shimura varieties, their reduction modulo p , and their stratification by Newton polygons. The book is suitable for graduate students and research

mathematicians interested in number theory, algebra, and algebraic geometry.

The English in Mind Combos offer flexibility in a contemporary English course for teenagers. Each Combo contains eight Student's Book units with the corresponding Workbook material grouped into two modules, and offers approximately 40 to 45 hours of classwork. Clear learning objectives at the beginning of each module, plus 'Check your Progress' sections at the end, help students and teachers plan learning more effectively. There are free Audio CDs/CD-ROMs combining an interactive CD-ROM and audio material. The English in Mind Combos can be used with mixed-ability classes. Combo Starter A is for complete beginners. Combos 1A and 1B are for elementary students; 1A contains a 16-page starter section to review key language. Combos Levels 2A, 2B, 3A and 3B take students from pre-intermediate to intermediate level.
