...

Molting is the process of a bird shedding old, worn feathers to replace them with fresh plumage. A molt may be partial

Online Library

Molting In

and replace just some of a bird's feathers or complete when all the feathers are replaced at once. The time it takes to complete a molt varies for different species, but may last as little as two weeks or

Online Library

Molting In

as long as
several years.

Birds By Erik I

Johnson

How and Why

Birds Molt

Molts Through a

Bird's Life

Cycle Molting

varies among

groups of birds

and

environmental

differences

throughout the

Online Library

Molting In

seasons. Small passerine birds (Cardinal, sparrows, juncos, and buntings) obtain their adult plumage in a single year while gulls and some birds of prey take 2-4 years. Eagles and condors

Online Library

Molting In

acquire their
adult plumage in
5 years.
