On a homestead in the rugged Missouri River Breaks of Montana, the Wortmans carve a brittle existence out of the sagebrush and gumbo, enduring the brutal weather, a harsh land, and dark family tragedies. This sweeping saga of homesteaders captures all the grit and determination of generations of the Wortman, Godsey, Gilmore, and Ness families as they move west from the Atlantic colonies to post-Civil War Missouri farms and on to the Montana Territory. Based on richly detailed family diaries and letters, West to Montana brings our American story to life in this classic family epic from author Christine Wortman-Engren.

The rivers of America flow from mountains, forests, and grasslands with astonishing beauty, essential to all life. Many of the best of these streams have been safeguarded under the National Wild and Scenic Rivers Act of 1968--America's premier program for the protection of our finest natural waterways. Wild and Scenic Rivers celebrates this creative conservation initiative with 160 stunning photographs and a lively history involving citizen activists, scientists, dedicated public officials, and enlightened political leaders. In commemoration of the 50th anniversary of the National Wild and Scenic Rivers Act, award-winning author and photographer Tim Palmer illuminates the values of this irreplaceable system of free-flowing streams, probes its problems, and addresses its future. With a depth of experience dating almost to the inception of the wild and scenic rivers program, Palmer has captured the splendor and essence of our most extraordinary rivers with his camera, and he has told their remarkable story as no one else could do.

This book presents case studies that share important experiences regarding Integrated Water Resource Management (IWRM) in various countries. Following an introduction to theoretical concepts, responsibilities, and challenges, the subsequent chapters address, among other topics, an analysis of policies and regulations for water management in Brazil, the drivers that led California to adapt to the IWRM framework, and the international regulations for water markets and water banking in Australia and Chile. The implications of climate change for water resource systems in Mexico are discussed, as well as management strategies for California that could potentially serve as IWRM adaptation schemes in Mexico. Critical cases from Guanacaste (Costa Rica), and from Zayandehrud River Basin and Lake Urmia (Iran) are reviewed in terms of management practices and solutions. The book also provides an overview of the current availability and use of water resources in South Korea, and discusses the management of and international water law instruments for transboundary groundwater in Africa.
