topology and the

discrete topology. (b).

Lemma 1. If (X, T) and

Online Library

Munkres

(X, τ) and (X, τ_0) are compact Hausdorff spaces then either τ and τ_0 are equal or not comparable. Proof. If (X, τ) compact and $\tau_0 \leq \tau$ then the identity map $(X, \tau) \rightarrow (X, \tau_0)$ is a bijective continuous map, hence a homeomorphism, by theorem 26.6. This proves the result. Finally note that the set of

Munkres

Section 13: Problem 3

Solution Working

problems is a crucial part of learning

mathematics. No one can learn topology

merely by poring over the definitions,

theorems, and examples that are worked out in

the text. One must work part of it out for oneself.

To provide that opportunity is the
