Critical care transport is a highly-competitive industry and to become a Flight Medical Provider(TM) you have to be the best.Since 2011, IA MED has helped thousands of students launch careers as advanced prehospital and critical care professionals by providing the most comprehensive, flexible, and accessible critical care education in the Nation.By presenting complex medical concepts through straightforward instruction, we make learning critical care simple - regardless of your current medical ability or experience. Our unique approach to advanced medical education has made IA MED(R) the industry-standard and a fan-favorite among paramedics, nurses, and other industry providers.The Flight Medical Provider Study guide will review the fundamentals of advanced prehospital care and critical care transport while also helping students as they prepare and successfully challenge the industry's most challenging exams: the Flight Paramedic Certification (FP-C), Critical Care Paramedic Certification (CCP-C) and Certified Flight Registered Nurse (CFRN) exams!This is EMS. Re-imagined.

As a registered nurse for the last 28 years, my primary clinical expertise has been working in the pre-hospital environment as a flight nurse and a paramedic, as well as continuing to work in a variety of clinical areas which include the emergency department, pediatrics and endoscopy. My extensive clinical background has also given me the opportunity to work as a legal nurse consultant with one of the largest law firms in Arizona. As an EMS educator and program director of paramedic training programs for the last 20 years and most recently as the National Clinical Educator for one of the largest air medical transport companies, I truly enjoy teaching in a simple manner as to assure that students do have a strong basic understanding in making critical care decisions and that they will be providing the highest quality of patient care beginning from the least to the most invasive management of care for the patients they are transporting. My goal as a professional and as an EMS educator has always been and will continue to encourage students to have the desire to learn and grow in their profession, as well as contribute to EMS in a way that inspires positive change. "Tell me and I 'll forget; Show me and I may remember; Involve me and I 'll understand" www.backtobasicscourse.com

Continuing education home study course intended to help assist you in addition to your American Heart Association (AHA) textbook. Approved by the California Board of Registered Nursing. In preparation for AHA and AAP classes of: BLS, ACLS, PALS, and NRP. Awards 30 CE's upon completion. Covers 2011 updates presented by the American Heart Association.
