(XX being the number of bits: 32 or 64)
The installer will also create the necessary environment variables (OPEN_NI_XXX), add the DLLs to the system path and register the internal modules with NiReg.

~~GitHub — OpenNI/OpenNI: OpenNI~~

OpenNI is an open-source framework for "natural interaction" - using your hands and body to interact with your digital devices. See OpenNI.org for more information about OpenNI. Most ROS users will not need to use OpenNI directly. `openni_camera` already implements a fully-featured ROS camera driver on top of OpenNI.

~~openni — ROS Wiki~~

The OpenNI library provides a general framework for working with various depth cameras using the following classes:
OpenNI is used for initialization of work

The OpenNI organization is an industry-led, not-for-profit organization formed to certify and promote the compatibility and interoperability of Natural Interaction (NI) devices, applications and middleware.

~~OpenNI on your PC | Kinect Hacks~~

OpenNI (Open Natural Interaction) is an open source Framework (under LGPL), partially developed by PrimeSense which is one of the creators of the Kinect. It provides standard abstract programming interfaces (API) (in C++ and C #) which allow developers to write applications based on natural interactions.
