The "origin of the soul" has provided a vexing question in Christianity. The major theories put forward include soul creationism, traducianism, and pre-existence. According to soul creationism, God creates each individual soul directly, either at the moment of conception or some later time.

Creationism is the view that God creates a new soul when a human being is conceived. Creationism was held by many early church fathers and also has scriptural support. First, Scripture differentiates the origin of the soul from the origin of the body (Ecclesiastes 12:7; Isaiah 42:5; Zechariah 12:1; Hebrews 12:9).

You may remember that the Bible was originally written mainly in Hebrew and Greek. When writing about the soul, the Bible writers used the Hebrew word ne?phesh or the Greek word psy-khe?. These two words occur well over 800 times in the Scriptures, and the New World Translation renders them "soul," either in the main text or in footnotes.

The occasion of these four books was furnished by a young man named Vincentius Victor, a native of Mauritania Csariensis, a convert to the catholic Church from the Rogatian faction (which split off from the Donatist schism, and inhabited that part of Mauritania which lay around Cartenna). This Victor, they say, had previously so high an opinion of the Vincentius who succeeded Rogatus as the head of the before-mentioned faction, that he adopted his name as his own. Happening to meet with a certain work of Augustin's, in which the writer acknowledged himself to be incapable of saying whether all souls were propagated from Adam's soul simply, or whether every man severally had his soul given to him by God, even as Adam himself had, without propagation, although he declared, for all that, his conviction that the soul was in its nature spirit, not body, Victor was equally offended with both statements: he wondered that so great a man as Augustin did not unhesitatingly teach what one ought to hold concerning the origin of the soul, especially as he thought its propagation probable; and also that he did state with so great assurance the nature of the soul to be incorporeal. He accordingly published two books written to one Peter, a presbyter of Spain, against Augustin on this subject, containing some conceits of the Pelagian heretics, and other things even worse than these.

Origin of the Soul and the Purpose of Reincarnation serves as a complement to prior books on reincarnation written by Dr. Semkiw, such as Born Again and Return of the Revolutionaries, which focus on cases that demonstrate objective evidence of reincarnation. Dr. Semkiw draws upon independent research to better understand the nature of the soul and how reincarnation works. He also utilizes information gathered through Kevin Ryerson, a trance medium who has been featured in Shirley MacLaine's books. Topics covered include when and how souls were created, how personality is determined, and the nature of time and space. Split incarnation, where one soul inhabits more than one body at a time, as well as ghosts, astrology, the Kabbalah and Enneagram are also addressed. Stages of initiation, identified in the life of Jesus, are reviewed, and child prodigies are explained through reincarnation. Respected clairvoyants have contributed to this book including Echo Bodine, Judy Goodman, Wayne Peterson, and Michael Tamura.

"At that time one Vincentius discovered in the possession of a certain presbyter called Peter, in Mauritania Caesariensis, a little work of mine, in a particular passage of which, touching the origin of souls in individual men, I had confessed that I knew not whether they are propagated from the primeval soul of the first man, and from that by parental descent, or whether they are severally assigned to each person without propogation, as the first was to Adam; but that I was, at the same time, quite sure that the soul was not body, but spirit. In opposition to these opinions of mine, he addressed to this Peter two books, which were sent to me from Caesarea by the monk Renatus. Aeterna Press

A journey into the immortal nature of the Soul, the landscapes of Heaven, and the purpose behind your incarnation on Earth • Reveals the connection between the soul and the orders of Angels and provides a roadmap to the realms of Heaven and Hell • Explains the six stages of Soul Evolution and the Nine Orders of Angels • Describes the many dimensions between the highest celestial realms and the lower Astral plane and the Genesis Matrix, our angelic place of origin Your Soul is a divine light originating within the Angelic Orders of Heaven. The Tibetan Book of the Dead speaks about the seven Lokas, or dimensions, the Soul travels through after death, while the Egyptian Book of the Dead refers to the Soul becoming one with the ever-renewing phoenix. Yet what is the phoenix but a symbol of our own Angelic Twin who resides in the highest realms, the essence of our Soul? In this book, Tricia McCannon explains how to discover the angelic realms where the highest parts of yourself reside and become the catalyst for your own path of ascension. Exploring the Soul's angelic origins, the Nine Orders of Angels, and the multi-dimensional landscapes of Heaven, McCannon takes you on the journey each Soul makes as it descends from the higher vibrational realms to arrive in the world of form. Drawing from the perennial wisdom of the Gnostics, Tibetans, Egyptians, Buddhists, Hindus, Hebrew mystics, and the ancient Mystery traditions, she looks at what our ancient ancestors have to say about the nature and history of the Soul. She reveals how, once embodied, the Soul loses its ability to vibrate with the highest celestial levels causing it to forget its purpose. She addresses how our illusion of separation from Divine Oneness arises, causing us to move away from the Light and become wrapped up in the Shadow of fear and suffering. She explains the six stages of Soul Evolution we must pass through to heal the wounds of separation, reawaken to higher vibrations, and remember our Soul's purpose, the reason your Soul chose this incarnation. McCannon shares stories from those who have returned from the Otherside, tales of revelation, temples of learning, and crystal cities of light. Presenting the great Course Curriculum of the Soul, the lessons we must master to complete our missions on Earth, the author shows that by remembering our divine essence we can move beyond conflict and struggle to embrace the love and joy that reside eternally at the core of our being.

This book rounds off the study of St. Augustine's view of the human condition which Fr. O'Connell began in St. Augustine's Early Theory of Man, A.D. 386-391, and continued in St. Augustine's Confessions: The Odyssey of Soul. The central thesis of that first book, and the guiding hypothesis of the second, proposed that Augustine thought of us in "Plotinian" terms, as "fallen souls," and that he interpreted, in all sincerity, the teachings of Scripture as reflecting that same view. O'Connell sees the weightiest objection to his proposal as stemming from what scholars generally agree is Augustine's firm rejection of that view in his later works. The central contention here is that Augustine did indeed reject his earlier theory, but only for a short while. He came to see the text from Romans 9. 11 as apparently compelling that rejection. But then his firm belief that all humans are guilty of original sin would have left him traducianism as his only acceptable way of understanding the origin of sinful human souls. The materialistic cast of traducianism, however, always repelled Augustine. Hence, he struggles to elaborate a fresh interpretation of Romans 9.11, and eventually he finds one that permits him to return to a slightly revised version of his earlier view. That theory, O'Connell argues, is encaesd in both the De Civitate Dei and the final version of the De Trinitate. This terse summary barely hints at the richness of detail contained here: O'Connell begins with a minute analysis of the third book of the De Libero Arbitrio, then of the letters and works ostensibly supporting rival chronological patterns which he must overturn in order to make his case. Finally, in the light of his findings, he offers fresh interpretations of Augustine's three mature masterpieces, On Genesis, The Trinity, and City of god. These, along with Fr. O'Connell's contention that Augustine's anti-Pelagian De Peccatorum Meritis et Remissione must have seen publication no earlier than A.D. 416/17, will doubtless fuel scholarly debate for some time to come. Indeed, Pelagianism made the question of the soul's origin so pivotal for Augustine, that few of our current interpretations of Augustine are likely to remain unaffected by the results of O'Connell's searching and provocative study.

The Sciences of the Soul is the first attempt to explain the development of the disciplinary conception of psychology from its appearance in the late sixteenth century to its redefinition at the end of the seventeenth and its emergence as an institutionalized field in the eighteenth. Fernando Vidal traces this development through university courses and textbooks, encyclopedias, and nonacademic books, as well as through various histories of psychology. Vidal reveals that psychology existed before the eighteenth century essentially as a "physics of the soul," and it belonged as much to natural philosophy as to Christian anthropology. It remained so until the eighteenth century, when the "science of the soul" became the "science of the mind." Vidal demonstrates that this Enlightenment refashioning took place within a Christian framework, and he explores how the preservation of the Christian idea of the soul was essential to the development of the science. Not only were most psychologists convinced that an empirical science of the soul was compatible with Christian faith; their perception that psychology preserved the soul also helped to elevate its rank as an empirical science. Broad-ranging and impeccably researched, this book will be of wide importance in the history and philosophy of psychology, the history of the human sciences more generally, and in the social and intellectual history of eighteenth-century Europe.
