Peace education is now well recognized within international legal instruments and within critical educational literature as an important aspect of education. Despite this, little attention has been given in the critical literature to the philosophical foundations for peace education and the rationale for peace education thus remains substantially an assumed one. This investigation explores some possible ethico-philosophical foundations for peace education, through an examination of five specific ethical traditions: 1) virtue ethics, whereby peace may be interpreted as a virtue, and/or virtue is interpreted as peacefulness, and peace education as education in that virtue; 2) consequentialist ethics, whereby peace education may be interpreted as education regarding the consequences of our action and inaction, both as individuals and collectivities; 3) conservative political ethics, whereby peace education may be interpreted as emphasizing the importance of the evolution of social institutions and the importance of ordered and lawful social change; 4) aesthetic ethics, whereby peace may be interpreted as something beautiful and valuable in itself, and peace education as emphasizing the importance of that beauty and value; and 5) the ethics of care, whereby care may be interpreted as a core element in peace, and peace education as encouraging trust and engagement with the other. The study addresses major contributions to each of these ethical traditions, the strengths and weaknesses of the tradition, and the ways in which the tradition provides support for peace education. It is argued in the thesis that each tradition provides only a partial basis for peace education, and that ultimately a holistic and integrative understanding is required, one that encourages a culture of peace. " ... an important addition to the emerging literature on peace education and the culture of peace" (From the Foreword by Koichiro Matsuura, Director-General of UNESCO).

In this book the Groupe des Dombes a widely respected yet unofficial dialogue of Reformed, Lutheran, and Catholic scholars from French-speaking Europe undertakes a comprehensive study of the complex issue of doctrinal authority in the church. This includes the role of Scripture, of confessional texts, of decision-making bodies, and of individual persons entrusted with authority in service to the unity of faith. / While a number of previous ecumenical dialogues have studied the question of authority with a particular focus on the ministry of the Bishop of Rome, the Groupe des Dombes lays out the complex constellation of questions that is at issue in the differing ethos of Protestant and Catholic traditions. Its challenge to the churches reflects the agenda of ecumenical dialogue for decades to come.

The series of reports, Monitoring poverty and social exclusion, produced annually since 1998 by the New Policy Institute and the Joseph Rowntree Foundation, has had a major impact on the debate about poverty and social exclusion in Britain, improving public understanding and holding government accountable for progress. Ever since the first report, however, there have been discussions about the need for a more Scottish-specific analysis, partly in response to a widespread view that some of the issues are somewhat different in Scotland (for example, in health and education) and partly reflecting the observation that much of the debate in Scotland takes place in a Scottish-specific context.

The beloved #1 New York Times bestseller, a "fiendishly plotted" (New York Times) "heart-in-your mouth adventure" (Washington Post) that "will take wing and soar into your heart" (Laurie Halse Anderson) October 11th, 1943--A British spy plane crashes in Nazi-occupied France. Its pilot and passenger are best friends. One of the girls has a chance at survival. The other has lost the game before it's barely begun. When "Verity" is arrested by the Gestapo, she's sure she doesn't stand a chance. As a secret agent captured in enemy territory, she's living a spy's worst nightmare. Her Nazi interrogators give her a simple choice: reveal her mission or face a grisly execution. As she intricately weaves her confession, Verity uncovers her past, how she became friends with the pilot Maddie, and why she left Maddie in the wrecked fuselage of their plane. On each new scrap of paper, Verity battles for her life, confronting her views on courage, failure and her desperate hope to make it home. But will trading her secrets be enough to save her from the enemy? A universally acclaimed Michael L. Printz Award Honor book, Code Name Verity is a visceral read of danger, resolve, and survival that shows just how far true friends will go to save each other.

Here in one easy-to-understand volume are the statistical procedures and techniques the agricultural researcher needs to know in order to design, implement, analyze, and interpret the results of most experiments with crops. Designed specifically for the non-statistician, this valuable guide focuses on the practical problems of the field researcher. Throughout, it emphasizes the use of statistics as a tool of research—one that will help pinpoint research problems and select remedial measures. Whenever possible, mathematical formulations and statistical jargon are avoided. Originally published by the International Rice Research Institute, this widely respected guide has been totally updated and much expanded in this Second Edition. It now features new chapters on the analysis of multi-observation data and experiments conducted over time and space. Also included is a chapter on experiments in farmers' fields, a subject of major concern in developing countries where agricultural research is commonly conducted outside experiment stations. Statistical Procedures for Agricultural Research, Second Edition will prove equally useful to students and professional researchers in all agricultural and biological disciplines. A wealth of examples of actual experiments help readers to choose the statistical method best suited for their needs, and enable even the most complicated procedures to be easily understood and directly applied.
