[Python Scripts For Abaqus Ebook](#)

In 2011 I published a book titled Python Scripts for Abaqus. The book explains how to enhance and control finite-element simulations in the Abaqus FEA software using the Python programming language. Using a Python script an analyst can automate a repetitive task, vary parameters as part of an optimization study, extract useful information from simulation output databases, or can customize the user interface.

The Abaqus Scripting Interface (ASI) is the python code that allows us to interact with Abaqus models and data. It includes many data types in a structure with methods to modify the data. In order to do things with Abaqus, we need to use this structure. If we want to use a certain output, for example, we need to know where to find it.
