For anyone, non-Muslim or Muslim, who wants to know how to approach, read, and understand the text of the Qur'an, *How to Read the Qur'an* offers a compact introduction and reader's guide. Using a chronological reading of the text according to the conclusions of modern scholarship, Carl W. Ernst offers a nontheological approach that treats the Qur'an as a historical text that unfolded over time, in dialogue with its audience, during the career of the Prophet Muhammad.

Reading the Qur'an in the Twenty-First Century considers the development of Qur'anic interpretation and highlights modern debates around new approaches to interpretation. It explores how Muslims from various theological, legal, socio-political and philosophical backgrounds think about the meaning and relevance of the Qur'an, and how their ideas apply in the contemporary world. The book: reflects on one of the most dominant approaches to interpretation in the pre-modern period, textualism, and the reaction to that in Muslim feminist readings of the Qur'an today. covers issues such as identifying the hierarchical nature of Qur'anic values, the criteria for the use of hadith in interpretation, fluidity of meaning and ways of ensuring a degree of stability in interpretation. examines key Qur'anic passages and compares pre-modern and modern interpretations to show the evolving nature of interpretation. Examples discussed include: the authority of men over women, the death of Jesus, shura and democracy, and riba and interest. Abdullah Saeed provides a practical guide for interpretation and presents the principal ideas of a contextualist approach, which situates the original message of the Qur'an in its wider social, political, cultural, economic and intellectual context. He advocates a more flexible method of interpretation that gives due recognition to earlier interpretations of the Qur'an while also being aware of changing conditions and the need to approach the Qur'an afresh today.

An introduction to the debates within the field of Islamic studies regarding the interpretation of the Qur'an and its relevance to contemporary issues in the modern world.

An Arabic-English edition of the Holy Book of Islam is presented in a poetic and contemporary translation that seeks to conserve the original cadences of the Quranic language and is complemented by explanatory notes that identify the full meanings of various terms. Reprint.

The Glorious Qur'an is God's divine book of guidance for all mankind. And The Contemporary Qur'an is an English translation of the Glorious Qur'an written in simple modern English for the reading pleasure of everyone who understands English. This translation is named The Contemporary Qur'an for three main reasons. Firstly because the Qur'an is always relevant at all times, hence it must be read and understood in the context of how its message can be related with and applied to the modern and contemporary setting that we live in today. Secondly because the passages are translated contextually instead of literally to bring out their meaning clearer and more accurately. And finally because wherever applicable, the interpretation takes into account of relevant historical and scientific facts that have only been made available by recent advancements in science and technology. Other than helping Muslims and new converts to gain better understanding of the meaning of God's literal words, The Contemporary Qur'an also strives to address the most fundamental question asked by non-Muslims about the Qur'an and Islam, which typically is: "How do you prove that the Qur'an is truly God's words and how can I be convinced that Islam is the true religion to follow?" The following approaches were taken to address this question: 1. In the book's Foreword section, I discussed about my own experience in seeking the truth and how I applied simple logic to show that Islam stands out from the other religions. 2. Through irrefutable historical and scientific evidence that have been proven by recent advancements in science and technology, I impressed on how impossible it is for the Qur'an to be authored by a mortal, especially so for someone who lived in the 7th century; and I also briefly explained how its linguistic beauty is a miracle that can never be rivaled until the end of time. 3. I also showed passages from the Qur'an that Islam is a truly universal religion for all which transcends race and ethnicity as it places very high emphasis on social justice for all. There is no racial supremacy in Islam. Everyone is equal in the sight of God and will be solely judged by their true faith and piety towards Him and the good deeds that they do. A true religion must have this universal feature because everyone is equal before his/her Creator. God cannot be God if He practices racial discrimination. 4. Through my footnotes on certain selected verses, I endeavored to make non-Muslims see that there is actually nothing wrong with Islam even though many of its followers and nations are besieged with woeful conditions mired by corruption and disunity. The problem is not with Islam, but with Muslims themselves who taint its beauty with their ignorance and over-emphasis on rituals that are not authentically prescribed by Islam but are instead "products" of culture and tradition that have been blindly inherited from earlier generations. Because of this, they become occupied with many unprescribed acts of worship until they unwittingly neglect the more important social responsibilities that have been commanded by God to address, such as the pursuit for quality education and equality before the law. Even worse, some tarnish and betray Islam simply because of their hypocrisy that is brought out from their insatiable greed for worldly gains. In summary, the Qur'an is truly a book of divine guidance for mankind which should not be ignored as it addresses the real concerns and challenges faced by every society at all times. And The Contemporary Qur'an is truly special in its own distinctive way which sets it apart from other English Qur'an translations as it aims to help us see Islam as a well balanced religion in living a blessed life in this world and emerge victorious in the next life to come if its true concept and teachings are properly understood and adhered to.

Few books have had a more profound impact on human history than the Qur'an. It shapes the beliefs, lives and behaviour of over 1.5 billion Muslims, who regard it as the Word of God, revealed to the Prophet Muhammad. Speaking directly to Muslims, it has been the basic source of law, morality and politics for over 1,400 years. Almost everything that happens in a Muslim society is a direct or indirect product of what the Qur'an says. But what does the Qur'an really say? How should it be read and interpreted? What is the significance of its teachings, if any, for the 21st century? In this enlightening and highly readable book, Ziauddin Sardar, one of the foremost Muslim intellectuals of our time, offers a refreshingly new interpretation of the Qur'an. Emphasising plurality and inclusiveness, Sardar demonstrates the importance of reading the verses of the Qur'an in the context in which they were revealed, and highlights the relevance of its teachings for today. Sardar reads the Qur'an from several perspectives. He begins with the traditional, verse-by-verse interpretations and subsequently shows how the multilayered verses and stories of the Sacred Text are open to a number of different and more enlightening interpretations. He also reads the Quran thematically, exploring its basic concepts and themes, painting a dynamic picture of the kind of society that the Qur'an aims to create. Also scrutinised is what the Qur'an says about such contemporary topics as power and politics, the rights of women, suicide, domestic violence, sex, homosexuality, the veil, freedom of expression and evolution. Throughout, Sardar uses several different methods, from traditional exegesis to hermeneutics, critical theory and cultural analysis to draw fresh and contemporary lessons from the Sacred Text. He shows what the Qur'an means to individuals like himself, why its interpretation has been so controversial throughout history, and how translations can be used to promote misunderstanding as well as enlightenment. Argumentative and lively, Reading the Qur'an is an insightful guide to understanding the Sacred Text of Muslims in these conflict-ridden and distressing times. Whatever one believes or does not believe, the central importance of the Qur'an in today's globalised world cannot be ignored.

This latest edition of Discovering the Qur'an includes a new preface by the author. Used by students around the world as a reliable guide to reading a translation of the Qur'an, it shows how the Qur'an is experienced by Muslims, describing the rhythmic and rhyme scheme structures, the context in which it is heard, the part played by learning by heart, and the importance of calligraphy. It is also about the Qur'an and its relationship to Muhammed, as well as helping to divine the ordering of the surahs or chapters. In an English-speaking world newly sensitized to Islam and its believers, Discovering the Qur'an will be an invaluable tool to greater understanding.

A contemporary translation of the Holy Qur'an with 3000 + biblical references

The Qur'an: Modern Muslim Interpretations offers a lucid guide to how Muslims have read the Qur'an in the twentieth and twenty-first centuries. Massimo Campanini explores early approaches to the understanding of the Qur'an, including that of the Salafis and the construction of the Islamic Renaissance Movement, contrasting the development of traditionalist and 'scientific' interpretations and examining the work of the phenomenologists who followed. This lively book explores the radical ideas of Sayyid Qutb and his followers, a significant part of what is known as political Islamism, and investigates the idea of exegesis as a liberation theology, through the work of Esack and Wadud. Students taking courses on the interpretation of the Qur'an will find this an invaluable aid to their study, and it is essential reading for all those interested in how Muslims have understood the Qur'an in the contemporary period.
