Retail Analytics Strategic Assessment and Forecast Till 2025:

The Retail industry faces major challenges in Europe: an uncertain economy, new digital competition, and a new generation of customers who are highly informed and more demanding. Regardless of these shifts, the basics remain unchanged : Retailers who accurately anticipate their customers' wants and needs – offering the right product, in the right place, at the right time, and for the right ...

Retail Analytics – Nielsen

By applying big-data advanced analytics to determine the net effect of promotions and price changes on whole categories retailers can evaluate cross-effects between products, forecast new product sales and account for lost sales to generate a demand forecast. This helps a retailer improve their in-stocks and reduce out-of-stocks.
