Or is legal reasoning mere ‘rhetoric’ in the pejorative sense, open to use, and abuse, to achieve whatever ends unscrupulous politicians, lawyers and judges desire? If the latter what becomes of the supposed security of living under the rule of law? This book tackles these questions by presenting a theory of legal reasoning.

The rule of three is a writing principle that suggests that a trio of events or characters is more humorous, satisfying, or effective than other numbers. The audience of this form of text is also thereby more likely to remember the information conveyed because having three entities combines both brevity and rhythm with having the smallest amount of information to create a pattern.

The Rhetoric is regarded by most rhetoricians as "the most important single work on persuasion ever written." Gross and Walzer concur, indicating that, just as Alfred North Whitehead considered all Western philosophy a footnote to Plato, "all subsequent rhetorical theory is but a series of responses to issues raised" by Aristotle's Rhetoric.

Is legal reasoning rationally persuasive, working within a discernible structure and using recognisable kinds of arguments? Does it belong to rhetoric in this sense, or to the domain of the merely 'rhetorical' in an adversative sense? Is there any reasonable certainty about legal outcomes in dispute-situations? If not, what becomes of the Rule of Law? Neil MacCormick's book tackles these questions in establishing an overall theory of legal reasoning which shows the essential part 'legal syllogism' plays in reasoning aimed at the application of law, while acknowledging that simple deductive reasoning, though always necessary, is very rarely sufficient to justify a decision. There are always problems of relevancy, classification or interpretation in relation to both facts and law. In justifying conclusions about such problems, reasoning has to be universalistic and yet fully sensitive to the particulars of specific cases. How is this possible? Is legal justification at this level consequentialist in character or principled and right-based? Both normative coherence and narrative coherence have a part to play in justification, and in accounting for the validity of arguments by analogy. Looking at such long-discussed subjects as precedent and analogy and the interpretative character of the reasoning involved, Neil MacCormick expands upon his celebrated Legal Reasoning and Legal Theory (OUP 1978 and 1994) and restates his 'institutional theory of law'.

Justice Antonin Scalia (1936–2016) was the single most important figure in the emergence of the “new originalist” interpretation of the US Constitution, which sought to anchor the court’s interpretation of the Constitution to the ordinary meaning of the words at the time of drafting. For Scalia, the meaning of constitutional provisions and statutes was rigidly fixed by their original meanings with little concern for extratextual considerations. While some lauded his uncompromising principles, others argued that such a rigid view of the Constitution both denies and attempts to limit the discretion of judges in ways that damage and distort our system of law. In this edited collection, leading scholars from law, political science, philosophy, rhetoric, and linguistics look at the ways Scalia framed and stated his arguments. Focusing on rhetorical strategies rather than the logic or validity of Scalia’s legal arguments, the contributors collectively reveal that Scalia enacted his rigidly conservative vision of the law through his rhetorical framing.

In The Art of Rhetoric, Aristotle demonstrates the purpose of rhetoric—the ability to convince people using your skill as a speaker rather than the validity or logic of your arguments—and outlines its many forms and techniques. Defining important philosophical terms like ethos, pathos, and logos, Aristotle establishes the earliest foundations of modern understanding of rhetoric, while providing insight into its historic role in ancient Greek culture. Aristotle’s work, which dates from the fourth century B.C., was written while the author lived in Athens, remains one of the most influential pillars of philosophy and has been studied for centuries by orators, public figures, and politicians alike. There has been much debate in scholarship over the factors determining the outcome of legal hearings in classical Athens. Specifically, there is divergence regarding the extent to which judicial panels were influenced by non-legal considerations in addition to, or even instead of, questions of law. Ancient rhetorical theory and practice devoted much attention to character and it is this aspect of Athenian law which forms the focus of this book. Close analysis of the dispute-resolution passages in ancient Greek literature reveals striking similarities with the rhetoric of litigants in the Athenian courts and thus helps to shed light on the function of the courts and the fundamental nature of Athenian law. The widespread use of character evidence in every aspect of argumentation can be traced to the Greek ideas of ‘character’ and ‘personality’, the inductive method of reasoning, and the social, political and institutional structures of the ancient Greek polis. According to the author’s proposed method of interpretation, character evidence was not a means of diverting the jury’s attention away from the legal issues; instead, it was a constructive and relevant way of developing a legal argument.

"Emerging as a global paradigm, the rule of law is widely accepted as an unqualified good, yet it has also come under criticism for its elusive nature and the wide divergence in its implementation. One of the clearest examples of this is in China and Vietnam, two states who have emphasized their adoption of a distinctly 'socialist' version of rule of law, in which their respective Communist Parties play a leading role. China and Vietnam's claim to have adopted rule of law is widely seen as a symbol of how the term has devolved into empty rhetoric. The rhetorical nature of the rule of law is widely invoked, yet seldom analysed. This thesis re-imagines the adoption of rule of law in China and Vietnam through James Boyd White's framework of law as constitutive rhetoric. I begin with the inherited language of the Western liberal concept of rule of law, which is contested and subject to a range of meanings. Contestations over its definition and elements have fueled its rhetorical power, by arming it with a meaning and authority that is arguable and uncertain. Driven by the desire to integrate into the global economic order, both China and Vietnam have made deliberate attempts to frame and align domestic legal reforms in the inherited language of rule of law. However, in adopting the language of rule of law, both countries have engaged in a 'rhetorical process of remaking and reshaping' Western rule of law principles by citing their socialist and Confucian traditions as a way to re-constitute an indigenous version of rule of law. Concurrently, in both countries the official adoption of the rhetoric of rule of law has created a wider rhetorical community in which legal scholars, the media and reformists within the Party and State have co-opted the rhetoric of rule of law to push for establishing a constitutional review mechanism. This has made it increasingly difficult for the Party and state to maintain a hegemony over the discourse of legal reform. Re-imagining rule of law adoption in China and Vietnam through the framework of constitutive rhetoric reminds us that conceptions of rule of law are not merely asserted by the state, but emerge out of ongoing interactions between the State and society. For rule of law, its elusive and contested nature is also its strength, as the ends that are sought by reforms are continually remade through the rhetorical process which infuse rule of law with meaning. This book analyzes the rhetoric of Donald Trump to argue that Trump embraces conflicting populist and Republican values, and as a result has relied on populist and polarizing rhetoric, along with fabricated crises, to reconcile these combating ideals and uphold his image of an “anti-status quo politician.”

This new book is intended for use by writing professors who want to inject more substance into their first-year legal research and writing course, as well as advanced legal writing students and upper-class students taking a seminar on rhetoric. The book is divided into two main sections: The first section examines rhetorical theory and its impact on legal argument from the time of ancient Greece to date. The second section, organized by the canons of classical rhetoric, discusses practical applications of rhetorical theory to the specific task of learning to think and write like a lawyer in the twenty-first century. By fusing theory and practice, a legal writer acquires depth-the ability to analyze an issue effectively using all available resources-as well as breadth-the ability to transfer her talent from one context to another. Each chapter includes questions for consideration by the students as well as samples exercises and suggested answers.

A classic in its field, this pathbreaking book humanized the scientific rhetoric of economics to reveal its literary soul. Economics needs to admit that it, like other sciences, works with metaphors and stories. Its most mathematical and statistical moments are properly dominated by comparison and narration, that is to say, human persuasion. The book was McCloskey's opening move in the development of a "humanomics," and unification of the sciences and the humanities on the field of ordinary business life.
