This kit has been devised to help teachers of primary science in schools of all sizes. The two-year age band structure, the compact size of the resources, correlation to the QCA Scheme of Work and recommended teaching times all contribute to making teaching science more effective in the school. The Teacher Resource Books contain a comprehensive series of clearly structured lesson plans that enable you to teach the QCA Scheme of Work, with six units in each year.

Over 100 projects demonstrate composition of objects, how substances are affected by various forms of energy — heat, light, sound, electricity, etc. Over 100 illustrations.

The Acts of Creation is a workbook that illustrates the tools and activities for expanding the intuitive, psychic, and spiritual senses, utilizing hands-on projects. While primarily designed to be used by adults who work and/or live with children, it can also be utilized by anyone who wishes to expand their metaphysical/scientific awareness. This publication synthesizes contemporary and historical knowledge and my personal experiences in the areas of metaphysics, quantum physics, parapsychology and radionics. Bridging metaphysics and science together is a main consideration of this publication developing into a concept I call Spiritual Sciences. This book includes experts in fields of parapsychology, quantum physics, psychology and metaphysics and their research that is utilized to bring unfamiliar knowledge to the forefront. Included is new information on zero-point energy technology and the Indigo children. As you become more involved in the processes in this workbook, you learn to create a stronger connection with the super conscious self. In turn, this workbook clarifies the relationship between the individual personality and the sacred enlightened self, the Over-Soul. This connection will expand your awareness of other intelligent life in the universe. As a learning specialist, I bring to this publication a professional and practical viewpoint to the parameters of Affective education. This methodology addresses the developmental levels of children creating a curriculum that expresses creativity, exploration and the spark that ignites new experiences, accelerating consciousness to the next level of awareness. The intuitive processes learned from this workbook will assist individuals in providing a clearer understanding of the subtle mechanics of the intuitive, psychic and spiritual senses. This knowledge will make the understanding of one's life goals more insightful, personal abilities stronger and spiritual dynamics clearer.

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a

suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This report contains guidelines and recommendations for managing and designing for friction on highway pavements. The contents of this report will be of interest to highway materials, construction, pavement management, safety, design, and research engineers, as well as others concerned with the friction and related surface characteristics of highway pavements.
