The Scholarship Handbook 2015 provides the most complete and authoritative facts about more than 1.7 million awards, including scholarship, internship and loan programs offered by foundations, charitable organizations, and state and federal government agencies. Every entry is verified by the College Board to be legitimate, up-to-date, accurate and portable to more than one college. This guide includes a planning calendar and worksheets to organize and keep track of scholarship applications. Indexes help students find programs by eligibility criteria—such as minority status, religious affiliation, state of residence and intended field of study—so they can quickly zero in on scholarships for which they qualify.

2170 programs offering private, federal, and state money. Over 1.8 million awards including scholarships, internships, loans.

As the author-pay model spreads across academic publishing, what are the possible consequences? Will the current rage for open-source scholarship actually accomplish anything other than shifting the furniture around on the Titanic? Will not Open Source in combination with Digital Humanities further destroy the very idea of "slow" and "thoughtful" work in humanistic studies?...It would seem that the author-pay model (formerly attributed to predatory publishers) is just another way of extracting tribute for the "privilege" of being published-enforceable only because academia has ratcheted up the stakes by enforcing research metrics and citations, in the public universities a practice that is primarily enforced by external "industrial" connections. Almost all public and private universities are heading toward measuring output with metrics-many academics now tailoring their CVs to show why they are "important," mirroring the social-media campaigns of celebrities and politicians, and many universities now citing their own "corporate" rankings when promoting their product (the University, the Institute, the Department, the Professor). Where this is all going is toward increased precarity for anyone who does not play the game. Individual, solitary scholars will have few options. Gavin Keeney, "Symptom 'A': The End," Knowledge, Spirit, Law Knowledge, Spirit, Law - as project - is a de facto phenomenology of scholarship in the age of Cognitive Capitalism. The six essays (plus Appendices) presented here cover topics and circle themes related to the problems and crises specific to neo-liberal academia, while proposing creative paths around the various obstructions. The obstructions include metrics-obsessed academia, circular and incestuous peer review, digitalization of research as stalking horse for text- and data-mining, and violation by global corporate fiat of Intellectual Property Rights and the Moral Rights of Authors. These issues, while addressed obliquely in the main text, definitively inform the various implied proscriptive aspects of the essays and, via the Introduction and Appendices, underscore the necessity of developing new-old means to no obvious end in the production of knowledge - that is to say, a return to forms of non-instrumentalized intellectual inquiry. To be developed in two concurrent volumes, Knowledge, Spirit, Law will serve as a "moving and/or shifting anthology" of new forms of expression in humanistic studies. TABLE OF CONTENTS // Preface/Acknowledgments - Introduction: Radical Scholarship - Essay 1: Re-universalizing Knowledge - Essay 2: Estranged Dawns - Essay 3: The Film-essay - Essay 4: Film Mysticism and "The Haunted Wood" - Essay 5: Circular Discourses - Essay 6: Verb Tenses and Time-senses - Appendix A: Agency 'X' Publishing Advisory - Appendix B: Perpetual Petition for the Right of the Author to Have "No" Digital Rights - Appendix C: Symptom "A" The End - References

The #1 selling scholarship guide from winners of more than \$100,000 in scholarships. A directory of more than 1.5 million scholarships, grants and prizes that you can use at any college, The Ultimate Scholarship Book includes helpful indexes to pinpoint the best scholarships for you.

Revised edition of: Oxford handbook of positive psychology and work / edited by P. Alex Linley, Susan Harrington, Nicola Garcea. -- Oxford; New York: Oxford University Press, 2010.

An examination of the uses of data within a changing knowledge infrastructure, offering analysis and case studies from the sciences, social sciences, and humanities. "Big Data" is on the covers of Science, Nature, the Economist, and Wired magazines, on the front pages of the Wall Street Journal and the New York Times. But despite the media hyperbole, as Christine Borgman points out in this examination of data and scholarly research, having the right data is usually better than having more data; little data can be just as valuable as big data. In many cases, there are no data—because relevant data don't exist, cannot be found, or are not available. Moreover, data sharing is difficult, incentives to do so are minimal, and data practices vary widely across disciplines. Borgman, an often-cited authority on scholarly communication, argues that data have no value or meaning in isolation; they exist within a knowledge infrastructure—an ecology of people, practices, technologies, institutions, material objects, and relationships. After laying out the premises of her investigation—six "provocations" meant to inspire discussion about the uses of data in scholarship—Borgman offers case studies of data practices in the sciences, the social sciences, and the humanities, and then considers the implications of her findings for scholarly practice and research policy. To manage and exploit data over the long term, Borgman argues, requires massive investment in knowledge infrastructures: at stake is the future of scholarship.

This book gives students inside information - but only what they truly need to create exceptional college and scholarship applications. The authors have taken their combined 30+ years of experience working with competitive selection processes and simplified it in an easy-to-use guide. All the Wisdom and None of the Junk gives students the techniques they need to excel in the high-stakes college application process by taking readers step by step through actual prompts and sample responses to the Common Application (accepted by nearly 700 colleges and universities) and the Boettcher Scholarship Application.

The Oxford Handbook of Methods for Public Scholarship presents the first comprehensive overview of research methods and practices for engaging in public scholarship. Public scholarship, which has been on the rise over the past 25 years, produces knowledge that is available outside of the academy, is useful to relevant stakeholders, and addresses publicly identified needs. By involving stakeholders in the entire process, and making the findings accessible, public scholars contribute to a crucial democratization of research. The Oxford Handbook of Methods for Public Scholarship features a wealth of highly respected interdisciplinary contributors, as well as emerging scholars, and chapters include robust examples from real world research in varied fields and cultures. The volume features ample discussion of working with non-academic stakeholders, coverage of traditional and emergent methods including those that draw from the arts, the internet, social media, and digital technologies, and coverage of key issues such as writing, publicity, and funding.
