Science And The Modern World
Alfred North Whitehead's SCIENCE
AND THE MODERN WORLD,
originally published in 1925,
redefines the concept of modern
science. Presaging by more than half a
century most of today's cutting-edge
thought on the cultural ramifications
of science and technology, Whitehead
demands that readers understand and
celebrate the contemporary, historical,
and cultural context of scientific
discovery.

Science continues to Make the Modern World. Whatever names we want to give to the leading edges of change—globalization, the networked society, the knowledge economy—it ' s science that ' s understood to be their motive force. It ' s science that drives the economy and, more pervasively, it ' s science that shapes our culture.

The separation of science and religion:
The modern world is increasingly
secular (atheist) than it has been
previously. This means that whereas
before religion was considered
correct, in the modern era the
evidence provided by science means
that it is seen as the predominant
authority and religion just fills in the
gaps that science cannot answer.
