Security Classification Guidance v3 Student Guide

A security classification guide is a record of original classification decisions that can be used as a source document when creating derivatively classified documents. OCAs are encouraged to publish security classification guides to facilitate a standardized and efficient classification management program.

Developing and Using Security Classification Guides

Introduction In October 2013, the UK government published the Government Security Classification (GSC) outline to ensure that all public sector organizations collect information appropriately. An important part of this outline is classifying information that is collected according to level of sensitivity.

Understanding the UK Government Security Classification

The GSCP uses three levels of classification: OFFICIAL, SECRET and TOP SECRET. This is simpler than the old model and there is no direct relationship between the old and new classifications. "Unclassified" is deliberately omitted from the new model. Government bodies are not expected to automatically remark existing data, so there may be cases where organisations working under the new system still handle some data marked according to the old system.

Government Security Classifications Policy—Wikipedia

A security classification (PROTECTED, SECRET and TOP SECRET) is only applied to information (or assets that hold information, such as laptops, USBs) if it requires protection because the impact of compromise of the information or asset would be high or above.

The GSC will involve new ways of working with ALL information security classified below SECRET. ALL such information will be classified OFFICIAL. The majority of police

The Government Security Classification Policy (GSC)

Information classification is a process in which organisations assess the data that they hold and the level of protection it should be given. Organisations usually classify information in terms of confidentiality – i.e. who is granted access to see it. A typical system will include four levels of confidentiality:

ISO 27001 & Information Classification: Free 4-Step Guide

- This security classification is applied to information the unauthorized disclosure of which would cause exceptionally grave damage to NATO. (NOTE: The marking "COSMIC" is applied to TOP SECRET material to signify that it is the property of NATO. The term "NATO TOP SECRET" is not used.)
