I've lived in this 5th wheel for 8 months now. Feels like a home with the reclining chairs, queen size bed, comfy couches, large tv screens, electric fireplace, and full-size fridge. Very well insulated and the heater and a/c keep the temperature quite comfy so I can sleep like a baby. The central vac makes cleaning a breeze too.

This is a well put together manual but didn't garner a full 5  
stars from me due to it being a 3-ring binder. It's very easy to  
tear a page and closing the binder is a pain as you have to  
flip all the pages back before shutting. Regardless of this the  
binder is a worthwhile addition.

In the organizational context, the word "innovation" is often associated with private sector organizations, which are often perceived as more agile, adaptable, and able to withstand change than government agencies and nonprofit organizations. But the reality is that, while they may struggle, public and nonprofit organizations do innovate. These organizations must find ways to use shrinking resources effectively, improve their performance, and achieve desirable societal outcomes. Innovation in the Public Sector provides alternative frameworks for defining, categorizing, and studying innovation in government and in the nonprofit sector. Through a diverse collection of international case studies, this book broadens the discussion of innovation in public and nonprofit organizations, demonstrating the hurdles organizations face and examining the technological advances and managerial ingenuity innovators use to achieve their goals, both within and beyond the boundaries of the innovating organization. The chapters shed light on key issues including: how to conceptualize innovation; how organizations decide between competing good ideas; how to implement innovation; how to contend with challenges to innovation; how to judge success in innovation This book provides current and future public managers with the understanding and skills required to manage change and innovation, and is essential reading for all those studying

The global economic downturn slowed economic activity in 2009, but achieving single digit inflation remains a challenge. Fiscal policy performance during 2009 was broadly satisfactory. Monetary policy was expansionary toward the end of 2009.

The signs of economic change loom large in the mountain West as shuttered mines and lumber mills are overshadowed by luxurious homes sprouting on valley bottoms and ridge lines. This perceptive book explains these changes, assesses their effects on the natural environment, and gauges the reactions of local communities. Drawing on concepts from economics, environmental ethics, and conservation biology, Booth suggests that the ultimate solution lies in re-directing population growth away from rural areas to reinvigorated and environmentally attractive ecological cities and to increase the density of development within rural areas themselves. Policymakers, activists, and local citizens concerned with rural sprawl will find this book an invaluable resource. Visit

The discussions took place in Freetown during March 29–April 11, 2012; and in Washington (April 21–24, 2012). They focused on conditions for completing the fourth ECF review, corrective measures to be implemented to address fiscal slippages that had occurred in late 2011, and policies for the remainder of 2012. Key performance criteria for end-December 2011 were met. However, sizeable spending overruns resulted in a higher-than-programmed fiscal deficit, financed by an increase in unpaid bills. Implementation of structural reforms was mixed, with some measures postponed to 2012. The authorities implemented all prior actions agreed with staff during the fourth ECF review discussions. Staff recommends completion of the fourth ECF review and the review of financing assurances.
