Participants in the Derivatives Market. The participants in the derivatives market can be broadly categorized into the following four groups: 1. Hedgers. Hedging is when a person invests in financial markets to reduce the risk of price volatility in exchange markets, i.e., eliminate the risk of future price movements. Derivatives are the most popular instruments in the sphere of hedging.

1 September 2020. Washington, DC - FIA today published a new policy paper in consultation with its members across the cleared derivatives industry on climate-related risks for financial markets and the global economy. The paper, "How derivatives markets are helping the world fight climate change," focuses on how the industry is already addressing this issue, and highlights potential partnerships with the public sector to help build a more sustainable economy in the long term.

Markets need to be part of climate change

Derivatives can be traded in two distinct ways. The first is over-the-counter (OTC) derivatives, that see the terms of the contract privately negotiated between the parties involved (a non-standardised contract) in an unregulated market. The second way to trade derivatives is through a regulated exchange that offers standardised
