engineers, mix, reproduce, and manipulate the equalization and electronic effects of sound. They don't have to work strictly in music. Some end up designing and controlling the sound at conferences, in theaters, and in any other venue that requires sound projection for an audience.

## What Does a Sound Engineer Do? - The Balance Careers

An audio engineer (or a sound engineer) is a trained professional who works with the mechanics of recording, mixing, and reproducing sound. Audio engineers are not the same as sound producers, writers, or performers, as they deal specifically with the technical and the mechanical aspects of music and sound; nothing else. We'd love your input!

What does an audio engineer do? ?

CareerExplorer

Audio engineer. An audio engineer at an audio console. An audio engineer (also known as a sound engineer or recording engineer) helps to produce a recording or a live performance, balancing and adjusting sound sources using equalization and audio effects, mixing, reproduction, and reinforcement of sound.

Audio engineer - Wikipedia

Audio engineers use machinery and equipment to record, synchronize, mix, or reproduce music, voices, or sound effects. They work on the production of movies, music recordings, live shows, or video games. They sometimes work under the job titles " sound engineering technician" and "audio equipment technician."
