Polynomials Answers

Since each term in the polynomial is divisible by both x and 5 , the greatest common factor is $5x$. In factored form, the polynomial is written $5x(3x^2 + x + 5)$. (b) $18x^3y^5z^4 + 6x^2yz^3 + 9x^2y^3z^2$. The largest monomial by which each of the terms is evenly divisible, thus the greatest common factor, is $3x^2yz^2$,
